Stretch and Pull Information

Introduction

Simple stretch and pull of tackboards are an important part of making the design process easier.

This capability will decrease the need for designers to engage Tailored Solutions for custom sized, wall mounted tackboards, in simple applications, and have list pricing and 3D Imagery immediately.

Units of Measurement

- Use either empirical or metric units to create the correct size in any application.
- Type “IN” after the number when using empirical measurement (example 47.2IN).
- Type the measurement only when using metric (example 900.3).
- Both measurements have one decimal location.
- Consider reducing the overall height of the tackboard by .25”(6mm) to allow for wire management of task lights and power modules during installation.
- Note, dimensions provided in the chart for Masters include .25”(6mm) Gap to allow for wire management.

Sizing

- This catalog code can be used to specify any Tackboard size subject to the current limitations.
  Minimum sizes:
  –Width = 8”(203mm)
  –Height =5”(127mm)
  Maximum sizes:
  –Width = 96”(2438mm)
  –Height = 96”(2438mm)
- Rightway fabric applications = Maximum 48”(1219mm)W x 96”(2438mm)H.
- Railroad (fabric applications = 96”(2438mm)W x 48”(1219mm)H.
- For applications with sizes greater than those listed, please specify multiple tackboards.

CET/Canvas

1. Bring in a Stretch and Pull tackboard from the Haworth Workstation Accessories Extension tab in Canvas.
2. Modify the starting elevation of the tackboard, as well as the height and the width, via the green box.
3. If the tackboard turns red, it means that the directionality of the fabric needs to be switched.
- Reminder that 48”(1219mm)W x 96”(2438mm)H is the largest size available, limited by our core material that the fabric is applied to:
  Example: KUAF-XXXX,3A-31,508,1333.5 metric
  KUAF-XXXX,3A-31,31.5IN,51.8IN inches

SPEC 5

1. Option standard part number (KUAF-1648 for example).
2. Double click on “Option Code” box.
3. Add 2 lines to the “Edit Parts Options”.
4. Height, then width, in millimeters or inches.
- Type “IN” after the number when using empirical measurement (example 47.2IN).
- Type the measurement only when using metric (example 900.3).

1. Make sure to start each line with a comma (,).
2. Change part number to (KUAF-XXXX).
3. Run the “Validation Tool” to confirm correct spec.

AutoCAD Specification

Bring in a tackboard that is closest to the size you need.

1. Bring in a 2D Symbol of the KUAF tackboard from the Compose Storage, Organization and Lights Catalog.
2. Make a copy of it and create a 3D.
3. Edit the 2D symbol in the Enhanced Attribute editor by double clicking on it.
4. Use that Enhanced Attribute Editor to change the part number to KUAF-XXXX,[FINISH],[HEIGHT],[WIDTH].
5. Edit the 3D symbol to the height and width required for the application if an Isometric View is required.

Wood Finish/Color Legend

Because of the natural properties of wood, variations of grain and finish color can be expected. Haworth carefully selects materials used in the manufacturing of products to ensure consistent and acceptable color.

Wood is susceptible to color change from exposure to UV rays. Haworth controls this by using surface finishes to reduce color change. However, change may be more evident in light-colored finishes.

All Haworth Wood Casegoods receive the Haworth EcoShield™ water-based, UV cured finish, except for Suite which receives a hand-applied, water-based finish.

EcoShield and hand-applied, water-based finished products are not designed to go together and are not recommended for use within the same space.

Masters Series has a water-based, UV cured EcoShield finish.

HAWORTH

Product Compatibility and Limited Warranty Policy

Great Expectations

You have them as a Haworth customer and so do we. And because we value our customers, we cover our products with the Haworth North America Product Compatibility and Limited Warranty Policy.

Our Commitment To Product Compatibility – Integrated Product Platforms

As a market leader in the design and manufacture of workspaces that adapt to change, we strive to maintain product compatibility within our various generations of integrated product platforms. This benefits the customer who desires to update or modify their work environment. It also benefits the customer needing to replace a product due to damage or other reasons but which is no longer manufactured or is otherwise unavailable, such as a fabric or finish that is discontinued because of changing market preferences. In both circumstances, we often can provide products with comparable function and performance.
