**Product Features**

- Includes wood top and attachment hardware.
- Wood veneer top has 3mm edgeband on user and guest edge, and 1mm edgeband on sides.

**To Order, Specify:**

- 1) Product number.
- 2) Wood finish color for top.

**Common Product Features**

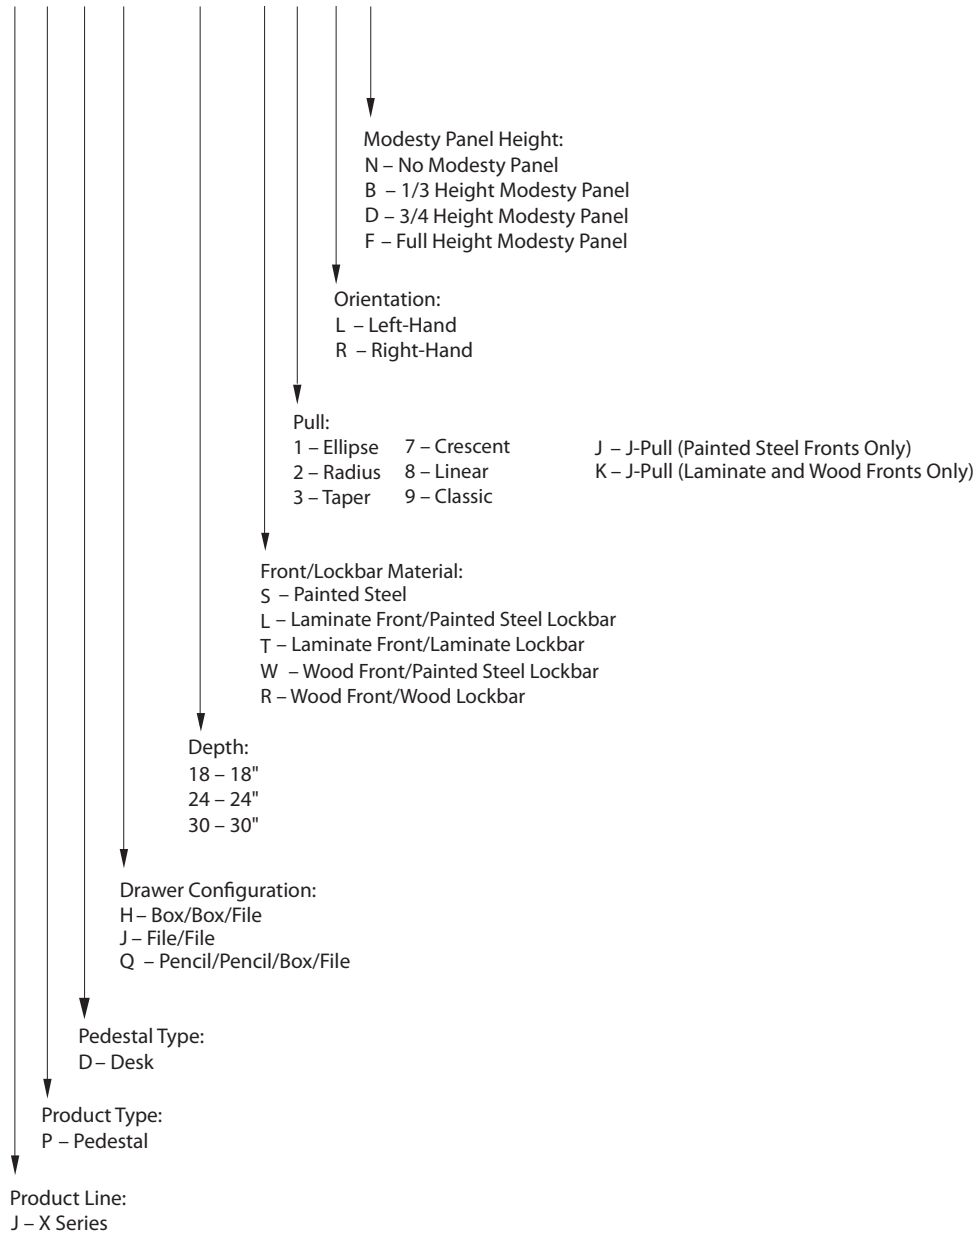

- Attaches to separately specified X Series attached lateral file(s), attached storage cabinets, attached combination units, and/or attached pedestals to create a credenza.

**Specification Tips**

- Not for use with X Series Desk Pedestals; modesty panel mounting holes on the side of the desk pedestal will be visible.
- Not for use with X Series Freestanding Files, storage tops are included with freestanding casegoods.
- Designing a storage credenza with attached storage pieces less than 24"(610mm) deep will result in an overhang at the back of the credenza top.
- When using attached pedestals the recommended nominal depth is 24"(610mm) to minimize overhang of the top. The actual depth of a 24"(610mm) deep attached pedestal is greater than other storage pieces; the recommended application is to place the pedestal(s) at the end(s) of the credenza to conceal the depth difference. 18"(457mm) nominal depth pedestals are less deep than other storage pieces and therefore not recommended.
- For a storage credenza with attached pedestals and lateral files, specify a proud front attached lateral (not inset front) to match the pedestal front.
- When designing a credenza to support a Vertical Storage Unit, both ends of credenza must be 24"(610mm) deep attached pedestals.

# COM Yardage Requirements

## Procedure

To confirm approval of or request new approval for COM's, contact the **Haworth Inquiry Center (1.800.426.8562)**, or <http://hub.Haworth.com>, or [www.haworth.com](http://www.haworth.com) > **surface collection** > **COM Library** to determine if the COM you have selected has already been tested and approved for use on our product.

If the fabric is approved, and the directional orientation (directional rightway, directional railroad, or non-directional) of the tested fabric has been confirmed, then refer to the appropriate column in the chart for yardage requirements.

### Steps to follow to calculate fabric usage:

- 1) Identify product type and size.
- 2) Determine method in which fabric is to be cut (directional rightway, directional railroad or non-directional).
- 3) Determine fabric roll width.
- 4) Find corresponding fabric usage value from the table.
- 5) Calculate fabric required using the formula below:

$$\text{Fabric usage} = \text{number of units} \times \text{number of sides with fabric} \times \text{fabric usage (from tables)} + C \text{ (constant).}$$

### Constant — Compose<sup>®</sup>, PLACES<sup>®</sup> and UniGroup<sup>®</sup>

### Constant — RACE<sup>®</sup>

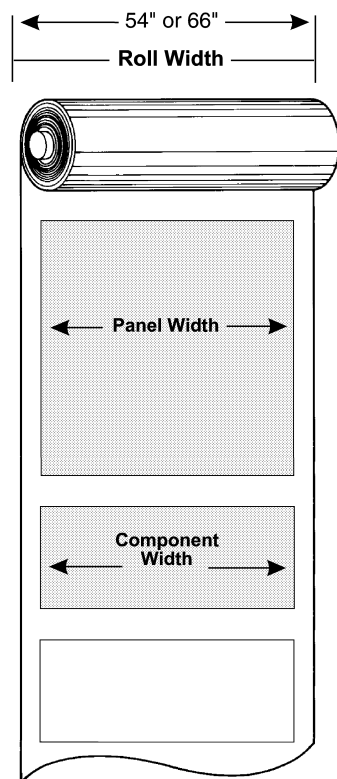

Product	C
Desktop Screens	1.5
RACE Privacy Screens*	0.0
RACE Pads	0.0

\*Includes fabric for both sides. Sizes 51"-78" include two screens.

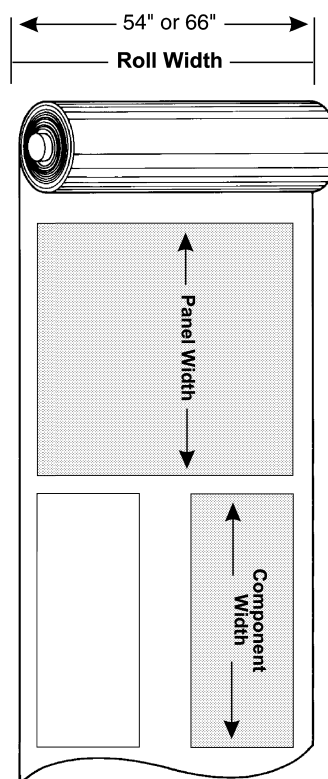

- 6) Repeat steps 1-5 for each product type, size and fabric.
- 7) Add all values together to find total number of linear yards required for the order. Add the appropriate percentage shown below to the total yardage to accommodate fabric flaws, wrinkles and other imperfections.
 

Up to 500 yards	Add 10%
501 to 1000 yards	Add 5%
More than 1000 yards	Add 3%

You have them as a Haworth customer and so do we. And because we value our customers, we cover our products with the Haworth North America Product Compatibility and Limited Warranty Policy.

## Our Commitment To Product Compatibility – Integrated Product Platforms

As a market leader in the design and manufacture of workspaces that adapt to change, we strive to maintain product compatibility within our various generations of integrated product platforms. This benefits the customer who desires to update or modify their work environment. In both circumstances, we often can provide products with comparable function and performance.
