Moveable Walls

Office spaces are getting smaller yet are expected to do more. Reconfiguration for today's workstyles and the anticipation of change is placing a strain on organizations with permanent interior construction. Moveable walls are a smart, responsive alternative, providing a sense of permanence while ensuring your endless ability to adapt.

With the look, feel, and acoustical performance of conventional construction, Enclose® moveable walls and doors offer space-saving, flexible options to create comfortable workspaces that support a range of privacy needs and nurture an effective, innovative workforce.

## Absolute Versatility

From formal conference rooms and small collaborative spaces to touchdowns and breakrooms, Enclose offers the versatility—and agility—to support your organization’s diverse needs. With a slim, four-inch frame depth and design that accommodates hanging desking and storage, Enclose cleverly utilizes space to create more workspaces in your floorplan, without sacrificing personal storage or privacy.

### **Acoustical Privacy**

With speech privacy being a primary source of worker dissatisfaction and stress, space designers are continually challenged with meeting acoustical needs to nurture an effective and innovative workforce. Enclose provides the acoustical performance needed to meet the speech privacy and confidentiality requirements of today's offices, without the need for fixed walls.

## Flexibility without the Effort

Move, add, and change your interior spaces with incredible efficiency. Enclose lets you create a floorplan that captures your intent today, adapts with ease, and retains its integrity through every iteration. Delivered as unitized panels, Enclose walls provide easy tilt-up installation. The non-progressive design lets you remove and switch any single panel or door without upsetting the rest. And Enclose can be reconfigured in one-third the time of many competing products, without disruption, dust, or excessive downtime.

## Greater Confidentiality for Private Spaces

In a class by itself, EFG 2 Channel provides exceptional acoustical management in a moveable glass wall. Daylight is allowed to permeate the space with views unobstructed by frames, while the sound of conversation is contained within. EFG 2 Channel features a dual track system that accommodates up to two panes of glass. Install one pane for a standard level of privacy, or two for greater confidentiality in private offices and conference rooms. Add a double-glazed door to minimize sound transfer to and from adjacent areas through the entryway.

## Design Choices

Enclose attends to a variety of needs and offers novel ways to meet design objectives for every space. Monolithic, segmented, and horizontal-spanning tiles are available in framed and frameless designs. Choose metal, laminate, wall coverings, back-painted glass, or wood with finishes to match your desking and storage. For a storefront look, choose Enclose Frameless Glass or double-paned Enclose Frameless Glass 2-Channel walls which offer greater privacy. Multiple door options—including double glazed, wood glazed, metal glazed, glass slab, and wood slab doors—complete the aesthetic.

## **Aligning People and Space for Optimal Performance**

Your people, organization, and facilities are at the center of everything we do. We help create spaces that solve for your business needs—resulting in effective people and efficient use of real estate.
