Soji

Task Stool

Soji™ task stool—part of the Soji seating family that offers more ergonomic options than most in its class—is designed for a variety of industries and people. Soji solutions provide effortless comfort while efficiently satisfying both workplace well-being and overall health safety strategies. In addition to office applications, Soji task stool is an ideal healthcare solution.

Features

- Seat height adjusts from 22" to 29.5" to accommodate activities at taller workstations and tables
- Soji standard knits, optional faux leather, and select fabrics are bleach cleanable with a 2% solution per CDC guidelines (cleaning instructions available at surfaces.haworth.com); leather upholstery options also available
- Faux leather option has seamless upholstered back and backer
- Fixed arms, height-adjustable arms, 4D, and armless options
- Optional patented, height-adjustable lumbar support
- Standard plastic 5-star base; optional aluminum

Certifications

- BIFMA LEVEL 3 Certified
- Meets BIFMA G1 - 2013 Ergonomics Guideline for Furniture
- GREENGUARD Gold Certified
