

# LIM

LEED

## LIM Contributions to LEED®

Minimize impact. Maximize investment. LIM™ is durable and adaptable so it will keep working for you through many years of change. LIM products may contribute to the individual prerequisites and credits of LEED. Because LEED is a holistic building rating system and sustainable design guideline, there is no such thing as LEED-certified products—only ways of using and applying products to support the criteria.

LIM contributes to the following LEED Certifications:

LEED 2009 for Commercial Interiors

LEED 2009 for New Construction

LEED 2009 for Existing Buildings

LEED 2009 for Core and Shell Development

HAWORTH®

# LIM™ Contributions to LEED® 2009

Product Name: LIM Light  
LEED Rating System: LEED 2009 for Commercial Interiors

---

## Energy & Atmosphere

---

Credit 1.1 **Optimize Energy Performance - Lighting Power** 1-3 points  
*LIM lighting solutions utilize energy efficient LED lamps.*

---

## Materials & Resources

---

Credit 2 **Construction Waste Management** 1-2 points  
*LIM packing materials include cardboard and polyethylene film, both of which are easily recycled in many markets.*

Credit 3.2 **Materials Reuse --- Furniture and Furnishings** 1 point  
*LIM products are designed for long life, contributing to this point on future projects.*

Credit 4 **Recycled Content** 1-2 points  
*LIM products may contribute to this point as a typical light contains 23% post-consumer and 6% pre-consumer recycled content.*

---

## Indoor Environmental Quality

---

Credit 6.1 **Controllability of Systems --- Lighting** 1 point  
*LIM individual task lights provide direct control of lighting levels.*
