

HAWORTH®

Sustainability by Design: Haworth's Workspace Case Study

Sustainability by Design: Haworth's Workspace Case Study (One hour course)

AIA Course #: HAW541; HSW/SD

IDCEC Course #: 5193; W

Subject Code: 2.12 Interior Design: Sustainable and/or Environmental Design

Course Description: As organizations look for sustainable workplace solutions, some may want to ensure their efforts meet LEED certification. This course gives a practical how-to based on a 'living lab' case study at Haworth, Inc. The renovation of corporate headquarters was completed in 2008. Learn how Haworth planned to earn points within each of the six LEED categories. Gain practical knowledge of products and processes that were pursued toward gold-level certification. Tour the headquarters during construction to see ideas and applications at work. Take away ideas for your own pursuit of LEED certification, or at the very least, ways to make work environments more sustainable.

Course Objectives:

- Define the areas of credit that Haworth, Inc. pursued for LEED (Leadership in Energy & Environmental Design).
- Understand the actions the company took to secure the points toward each credit category in LEED-NC.
- Tour areas on the renovation to see examples of where/how points may be earned.
- Gain ideas for how to secure LEED points and/or implement sustainable initiatives within your own organization.

Content Outline:

1. Introduction to LEED Gold-Level Certification for New Construction.
2. Haworth's approach to capturing credits based on LEED guidelines.
3. Sustainable Sites:
 - Water Efficiency
 - Energy & Atmosphere
 - Materials & Resources
 - Indoor Environmental Quality
 - Innovation & Design Process
4. Tour of Haworth Headquarters renovation project.
5. Summary and Q & A Discussion.
