

# A CELEBRATION OF DESIGN

One Haworth Center is a testament to our strong passion for design. Every inch of our unique headquarters has been created to inspire members, as well as guests, from the moment they walk through our door. From the physical attributes of the building itself, to the furniture and interior features, we celebrate how design is incorporated into everyday life.

## Building Relationships

Over the years, our members have had the pleasure of developing relationships with many gifted professionals. Their expertise includes architecture, construction, interior design, sustainability, computer technology, and the social sciences. Along the way, we discovered the artistic talents many of them possessed outside the workplace. Knowing this, we asked these individuals if they would be willing to share their creations in our new space. Their answer was a resounding, "Yes." Hence, the Art of Friendship collection was started.

## The Collection

The Art of Friendship Collection brings an added source of human expression to our facility. Its presence not only serves as a source of inspiration, but as a tribute to the relationships we maintain with its talented creators who have inspired and supported us through the years. It is our hope this display not only draws attention to these artists' creative talents, but to the larger, more encompassing, world of design. Installations range from paintings, to sculptures, to photography, to collage, and can be appreciated in several locations throughout the space.

"Series of Small Paintings" by Larry Scarpa

"Farnsworth House" by Jon Miller

"Lake MI, Muskegon" by David MacKenzie
