Masters Series — Finish Matrix

Wood Finish/Color Legend

Because of the natural properties of wood, variations of grain and finish color can be expected. Haworth carefully selects materials used in the manufacturing of products to ensure consistent and acceptable color.

Wood is susceptible to color change from exposure to UV rays. Haworth controls this by using surface finishes to reduce color change. However, change may be more evident in light-colored finishes.

All Haworth Wood Casegoods receive the Haworth EcoShield™ water-based, UV cured finish, except for Suite which receives a hand-applied, water-based finish.

EcoShield and hand-applied, water-based finished products are not designed to go together and are not recommended for use within the same space.

Masters Series has a water-based, UV cured EcoShield finish.
