

Aloha Active Task Mesh Back

PRODUCT CATEGORY: SEATING

PRODUCT ENVIRONMENTAL DATA SHEET

SECTOR: ASIA PACIFIC

HAWORTH®

The Aloha Active task features a recline mechanism that responds to user’s weight with minimal adjustments. With fewer knobs and dials the chair is simpler and cleaner looking which is perfect for a variety of application (workstation, conference room, home, office, etc.). Also it features a premium mesh and aluminum base as standard.

RECYCLED CONTENT

	Material Weight			Post-Consumer Recycled Content			Pre-Consumer Recycled Content		
Steel	4.72	lbs	30%	0.94	lbs	6%	0.66	lbs	4%
Plastic	10.17	lbs	65%	0.00	lbs	0%	0.00	lbs	0%
Foam	0.72	lbs	5%	0.00	lbs	0%	0.00	lbs	0%
Fabric	0.01	lbs	0.1%	0.00	lbs	0%	0.00	lbs	0%
Total	15.62	lbs	100%	0.94	lbs	6%	0.66	lbs	4%

PRODUCT CERTIFICATIONS

We pursue voluntary third-party sustainability certifications for many of our products. The different standards we observe cover a wide variety of sustainability aspects. Certificates reach from single-attribute certifications to holistic standards that assess the entire value stream according to defined sustainability requirements.

MATERIAL CHEMISTRY*

We believe that our products should be safe for humans and the environment. That's why we are working diligently to identify and eliminate chemicals of concern in the materials we source. While we have identified more than 870 chemicals that we plan to eliminate from our products throughout the next 10 years, we have identified 56 chemicals that we plan to eliminate by 2015.

These include, among others, PVC, benzidine dyes, ozone depletors, hexavalent chromium, certain hazardous phthalates, and PBDE flame retardants. We are committed to achieving this goal and being transparent with our customers about our progress.

LIFE CYCLE ASSESMENT (LCA) SUMMARY*

Life Cycle Assessments (LCAs) are one tool which allows us to enhance the triple bottom line of Haworth products by identifying high environmental impact stages within our products' lifecycles. Haworth is committed to better understanding and reducing the impacts of our products and operations on the natural world.

At Haworth, we are committed to looking beyond carbon footprint by taking a detailed inventory of our product's impacts through LCA, including human and ecosystem toxicity, land use and water quality. Over the past several years, Haworth has conducted over 95 product life cycle assessments globally. Results of the LCA studies provide value in the identification of cost savings, improvement of design and material evaluation, advancement of procurement and transportation decision making, new product development criteria, as well as ultimately reducing Haworth's impact on the environment through continuous improvement efforts.

RECYCLABILITY & END OF LIFE MANAGEMENT

	Material Weight		Recyclable Content	
Steel	4.72 lbs	30%	4.72 lbs	30%
Plastic	10.17 lbs	65%	10.17 lbs	65%
Foam	0.72 lbs	5%	0.00 lbs	0%
Fabric	0.01 lbs	0%	0.01 lbs	0%
Total	15.62lbs	100%	14.90 lbs	95%

Once a Haworth product reaches the end of its life, our product's end-of-life program ensures that customers have options (e.g., recycling, resale, refurbishment, and donation) to prevent it from being discarded into a landfill. To encourage recycling, we have published disassembly instructions for many of our products on the individual product pages. Our products have been intentionally built using highly-recyclable metals and plastics including steel, aluminum, polypropylene, and nylon.

We encourage our customers to contact us regarding end-of-life options in their region so that we can help them make the world a better place for future generations.

LEADERSHIP IN ENERGY AND ENVIRONMENTAL DESIGN (LEED®)

Interior Design and Construction (ID+C)

MRC4: Recycled Content	Aloha Active Task Mesh Back contains 6% post-consumer and 4.2% pre-consumer recycled content.	1-2 points
