Conferencing rooms connected to technology

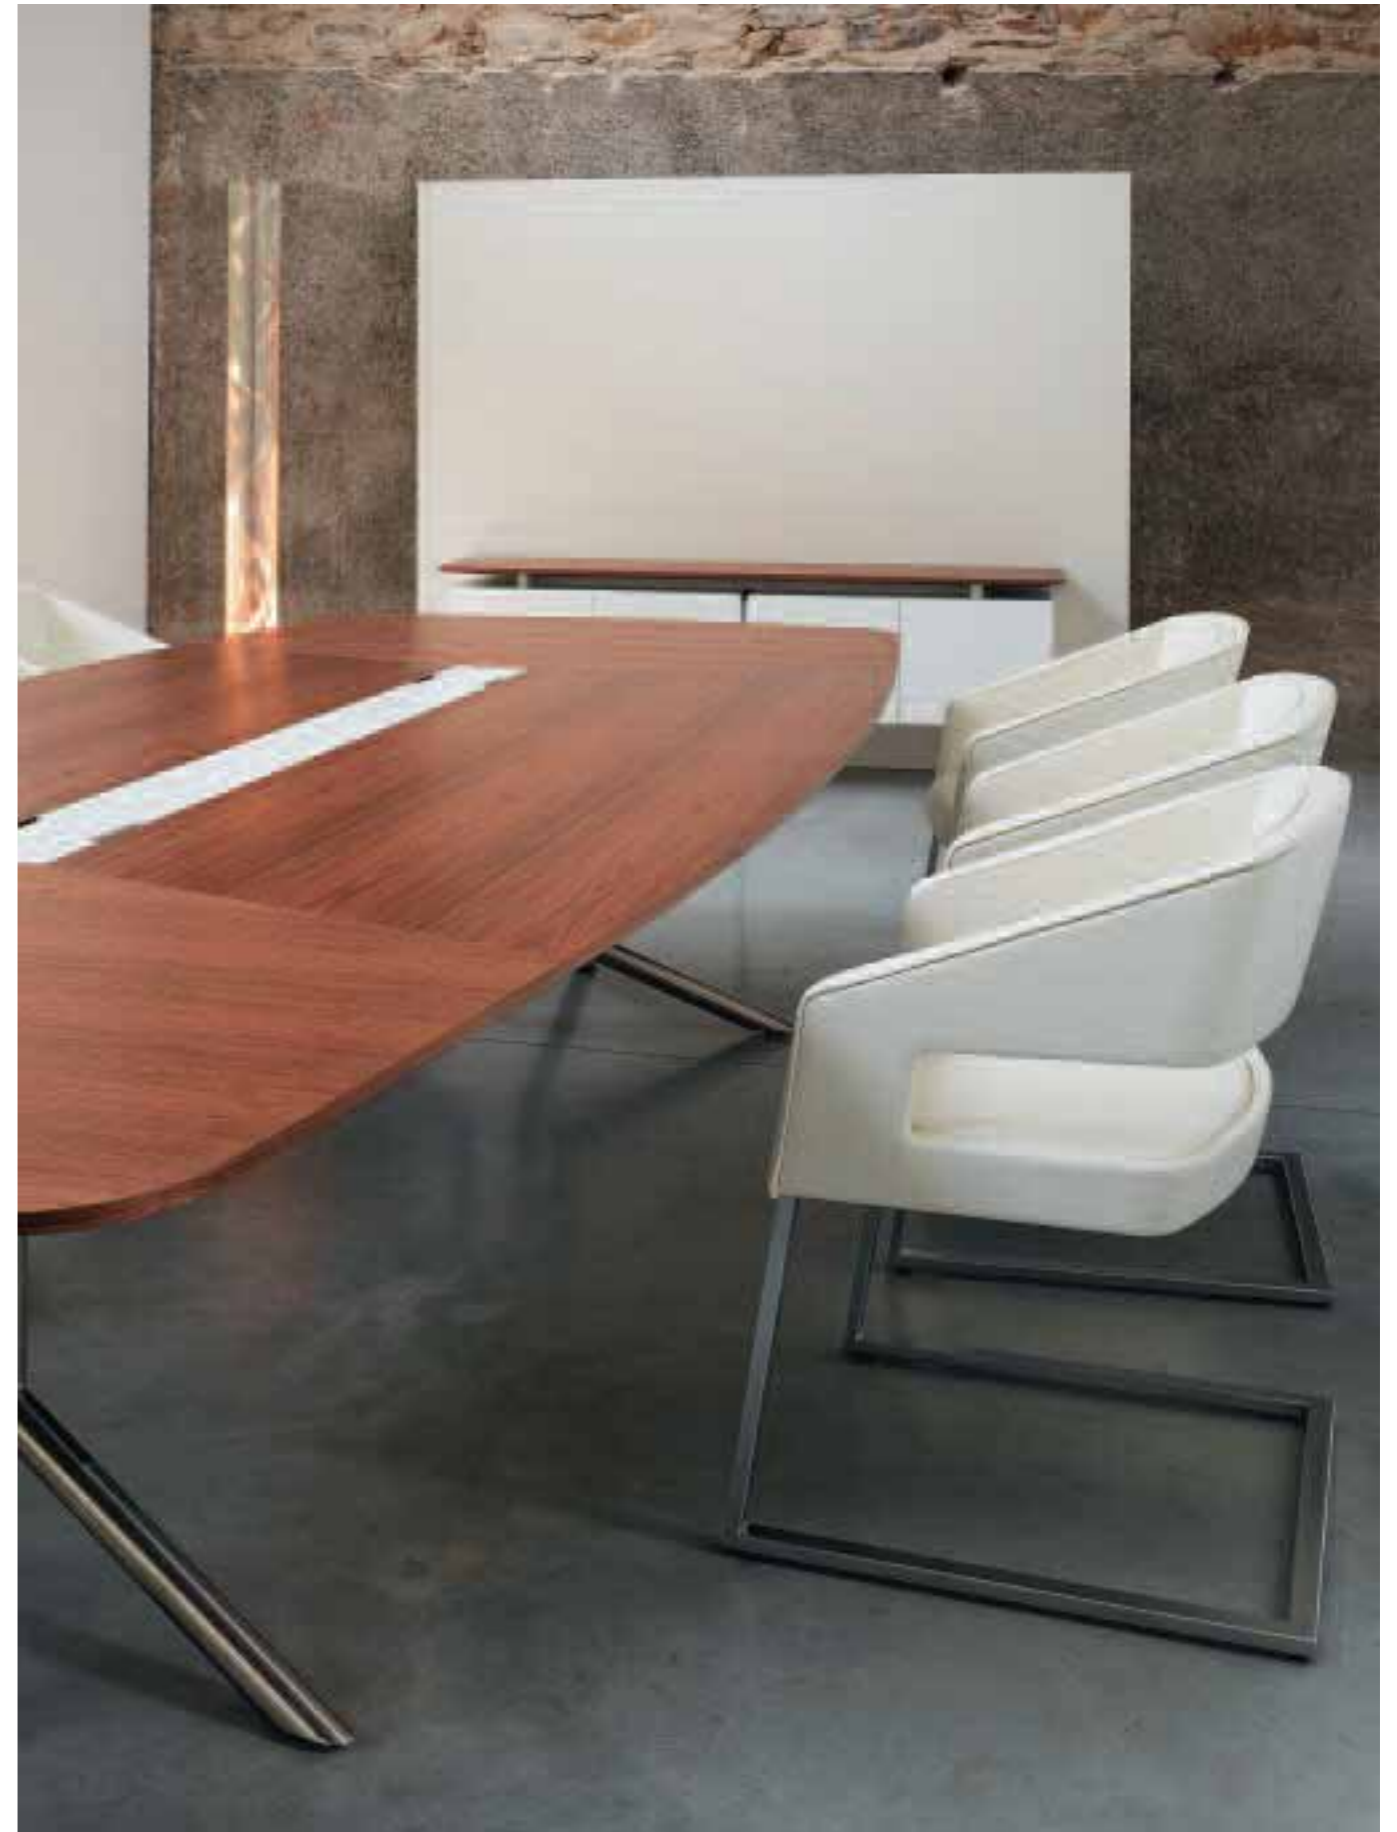

Similar to a fingerprint, a conference table is unique. Audience is a program "a la carte" offering a customized answer to each conference space: integrated technology, functionality and image are foremost in our design.

Audience boasts a heritage of more than 60 years in top-of-the-range veneer work.

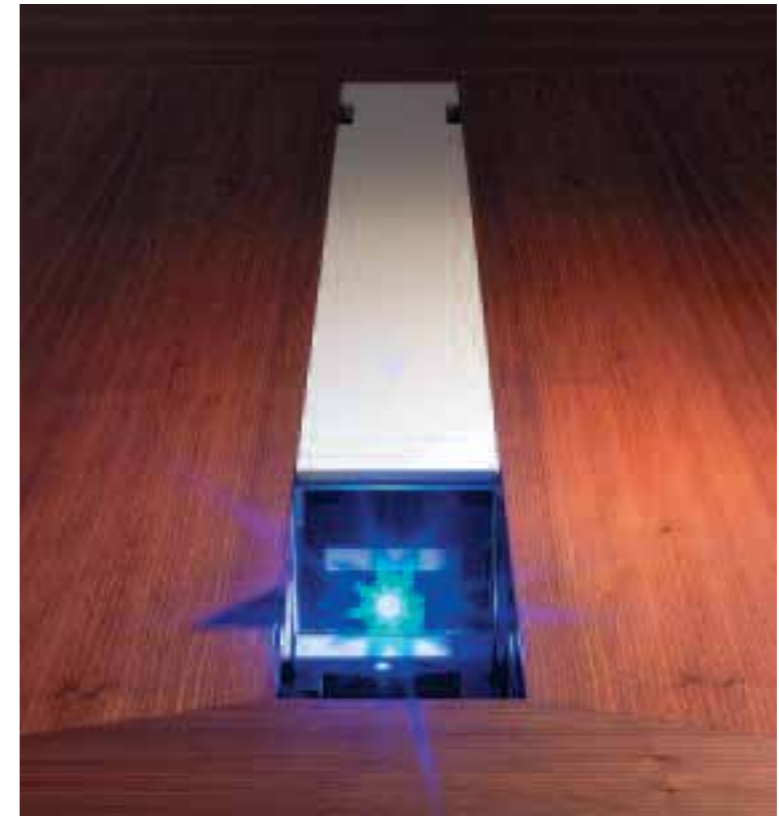

It offers a wide range of finishes and shapes: rectangular, elliptical, boat, U-shaped, round and square. In addition, ancillary storage, multi-media furniture and a lectern complete the range.

The use of high technology is not a constraint anymore; it is now perfectly integrated, discreet and intuitive. Both speaker and audience gain in serenity and efficiency.

Design Albert Holz.

Mirror technique projection system folds away invisibly to leave a clear line of vision.

"It is simple elegance that charms us".

Ovid

The experts will recognize Charles Eames homage
and 60s design references in the legs' characteristics.

Videoconference – Bringing people together across challenging distances. Reducing business travel's impact on the environment.

Rotating power socket

Lectern with integrated technology. The speaker doesn't have to take care of technical details but stays focused on his meeting.

One screen for each participant. An ideal solution for large rooms where video projection is inadequate. Double-sided screen revolutionizes the meeting concept by encouraging visual contact and interaction.

Double-sided screen

Doppelseitiger Bildschirm

Ecran double face

Dubbelzijdig scherm

Mediacar for projection

It may include a central unit, a video projector and also hold a laptop horizontally. This mobile and versatile item of furniture follows the speaker's movement.

Walnut, oak, cherry, maple... veneers are selected carefully and are sourced from sustainably managed forests where the environment is respected and its renewal looked after.

From storage to electrification, everything has been thought of to marry elegance and functionality.

Vertically retractable power socket

Sideboard – More than a storage solution, the sideboard is a personal and refined creation that humanises the professional atmosphere.

Mediacar, the speaker's collaborator

Available in a high version, it may integrate a retractable screen with keyboard, a central unit and PA system, a room management system or different connecting cables. It also exists in a low version for projector and laptop.
