A SPATIAL SENSE AND RESOLUTELY UP TO
THE CHALLENGES OF A FLOURISHING NEW
ECONOMY.

Tibas

Experience timeless, functional design and great looks that adapt
effortlessly to the way you want to work today – and beyond.

Enter the Idea Economy

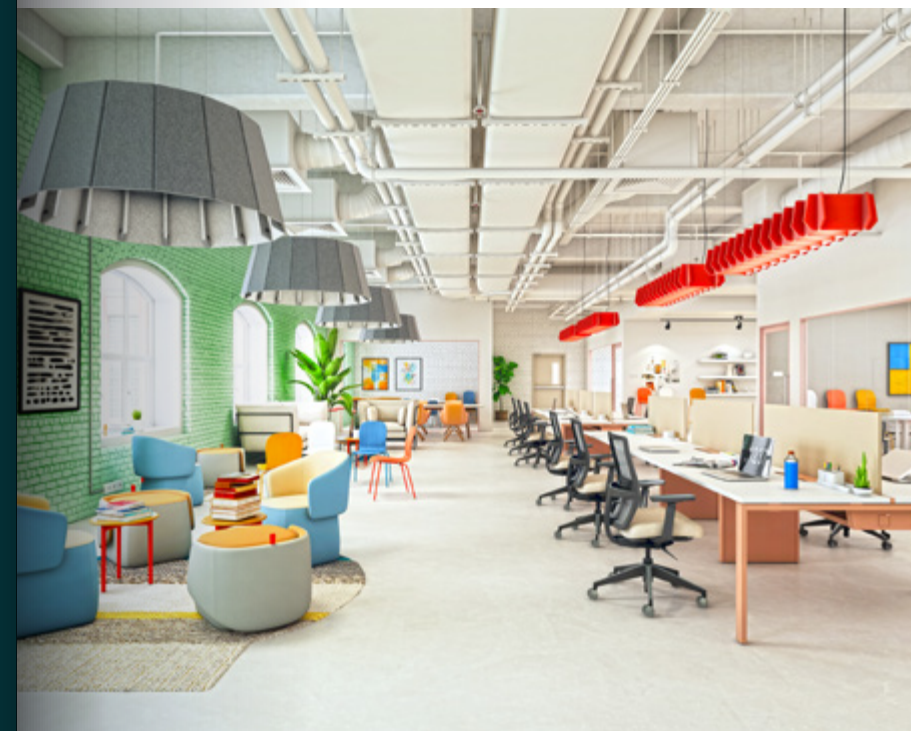

Today’s rapid-fire data exchange and relentless disruption has given birth to the ‘Idea Economy’ – and it’s changing the way we work.

Good ideas have always driven business success. But our new propensity for hyper-connectivity and instant gratification fused with the emergence of new channels, markets and business models means good ideas are no longer good enough.

Success now means turning those ideas into value faster than your competition.

It’s time to think differently about how we do business

Multiple generations now cohabit our workplaces – each with their own work style. And, as the time to process vital market information shrinks exponentially, traditional hierarchies are shifting and outmoded rules are being broken to make way for the new.

Get Ready for Change

Disruptive tools are everywhere. Start-up entrepreneurs have easy access to the kinds of resources once only available to Fortune 500 companies. This challenge to the status quo is revolutionizing entire industries at a lightning pace never seen before.

Staying nimble is more crucial than ever for organisational survival. An inflexible infrastructure makes it impossible to apply an innovative idea or pivot should your industry landscape change suddenly.

Foster an Agile Workplace

Fast-paced work environments need tried and tested workspace solutions that help users meet shifting demands, foster new ideas, and tackle potential disruptors head on.

Tibas nurtures the kind of human and workplace-friendly spaces that make adapting, focusing and collaborating easier. It has the flexibility and spatial smarts to support your people to remain at the top of their game – whatever a disruptive market throws at them.

Simply Timeless

The Tibas desk is remarkable for its simple, sculptured, naturally-fluent design aesthetic. In fact, it's the pioneer of a new generation of office furniture that's smarter, more ecological and economical.

The desk top appears to float gently over its sturdy frame, delivering elegant support for countless ways of working. A widened open view means it's easy to spread out your materials and free associate or create a more private environment to chase down that great idea.

Trends might come and go, but Tibas will always look effortlessly cool.

Tibas' clean, minimalist, and deceptively simple table and bench designs fits seamlessly into every workplace, however you choose to configure them.

Human-Friendly

Tibas is more than just a workstation. It's an impressive creative space for collaboration, too.

When you need to shift focus, its extended solutions allow you to change things up in an instant – share a single leg and frame side between two desks and you've doubled your available workspace, saving on room and costs.

Productive conversations between teams can therefore take place right where the action is – there's no need to move everyone to a separate location.

Plus the wide, clear workspace means there's a spot for every tool essential for brainstorming and organizing new ideas. Everything's at your fingertips when you need it most.

And that means your people are primed to maximize their performance, improve their efficiency and revolutionize their thinking at a moment's notice.

Budget-friendly

More agile workspaces mean creating more variety in your floorplate settings to accommodate different ways of working. You asked for more cost-effective and reliable desk and table solutions to match your changing needs, and we've delivered.

Tibas' simple statement of line is purpose-designed to meet your exact requirements.

A Global Conversation

As part of the extended Haworth design family, the Tibas system is designed on a shared Asia Pacific and European platform.

That makes it the ideal solution for multinationals because it can be seamlessly integrated into connected work environments for a unified look and feel.

It also has endless potential – upgrade and expand it as your organization grows and watch how it maintains its top-of-class performance in any workplace.

Settings to Suit Your Space

Tibas is as flexible as you need to be. Choose from a variety of screens – modesty, desk, single or double hung – for a wide range of work styles.

Add your choice of power option – intermediate leg, cable tray, umbilical cord, grommet or soft-closing flip-top – to streamline your space to your exact specifications.

Configure Your Way

Whatever your workplace prerequisites, Tibas has you covered.

Create private workstations, collaborative clusters, L-shaped arrangements and everything in between – Tibas will always look right in place.

Exceptional Sustainability Credentials

Sustainability is an integral part of our company culture and Tibas is designed with the highest standards of safety, durability and quality.

We've thoughtfully selected materials that are sustainable, free of hazardous substances and from recycled sources where possible. Tibas is also almost fully recyclable when it reaches the end of its long life.

We only use certified manufacturing facilities and make sure our logistics are optimized to save on resources and packing materials.
