

Leading Global Insurance Company

Manila, Philippines

Case Study

Our client financially empower its customers by providing fair, transparent banking and supporting them to get ahead. They do this by offering simple and fair products, advocating for greater choice and control, and rewarding customers for positive financial behaviours.

In its refurbished 13,000sqm Philippine office, the client wanted a purpose-built workspace space that met its needs as a multi-departmental company. It wanted its work furniture to support greater flexibility, collaboration and inter-department interaction while also delivering cost-effective personal storage systems for employees and a relaxed, cool and comfortable environment for all.

Our solution ticked all the boxes. We specified 1600 Intuity System workstations for the ultimate in flexibility and scalability. We used low 1000mm H thin screens to allow ambient light to enter the floorplate and promote collaboration and discussion among team members. Low partitions further worker interaction yet deliver enough privacy for focus work.

We selected EZ65 2.0 Lite, Very and Very Executive task-chairs for their outstanding ergonomics at an affordable price that's unrivalled in the marketplace. Bazic storage delivers a softer solution to free up floor space and provide ample room to store away employees' personal possessions safely.

Earth-toned OB Hay swivel chairs In meeting rooms and Intuity lounges in break out areas achieved the homey, friendly feel they were seeking.

The client gave us a perfect 7/7 score for the fit out; it was delighted Haworth delivered ahead of schedule (despite very tight timelines) and supported the workplace transition with orientation, training and maintenance tips on handover. Although the new fit out has only just been completed employees are already raving about Haworth furniture and the flexibility it offers them.
