Drift 62 Partitions

Drift 62 partitions were designed to meet the needs of an increasingly nomadic workforce, with workers who require a variety of focused and collaborative applications throughout their day. Featuring a clean profile and offered in a variety of expressive colours, Drift adds a distinctly residential touch to traditional workstations with the added benefit of optional noise absorption in an open office plan. Drift 62 partitions product portfolio offers two panel types, standard and an acoustic element which offers acoustic absorption in order to best suit the workplace.

Features

- Designed for easy planning alongside other Haworth furniture solution
- Tool-free design, for easy installation
- Invisible frame construction with fabric upholstery
- Elements (single, start and end elements) with rounded and 90° top corners

Configurations

Options/Examples

Partitions with Rounded top corners
Straight connections built in. I, L, T, X, Y connections are possible. On a straight wall, the connectors are completely invisible, while corner connectors are stylised and available in colours to complement the panel fabric finish.

Partitions for Closed Configurations
Start, middle and end panels are designed to avoid connecting two rounded edges together. A single start and end element combine with any number of middle elements to create a freestanding wall. Connectors are completely invisible. The panels should not be used independently.

Connection of partition elements of different heights is possible, including linear, I, L, T, X, Y connections are possible.
