Brunner crona light

My Profile:

Brunner lives for furniture that makes new things possible. I'm living proof of this - time and time again. Although I'm a slim lightweight, I'm full of possibilities - and now I'm even taking it to the next level in the event sector. Or the next five. With my new and improved sled base, I can be stacked five-high as the perfect complement to my four-footed variant in steel tubing. This comes either chrome-plated or powder-coated in seven harmonious colors, matching my robust, easy-care plastic seat shell in its modern crona design as well as the optional seat cushion. These also work superbly well on my delicate swivel base or the comfy wooden legs. You would like a little more support? No problem! Naturally, I can also come with arm rests.

Pair me with:

I proudly bear the name crona and create a harmonious overall image with all the components of this collection - thanks to the striking design of the seat shell, which interprets coziness in a modern and comfortable way. I'm also happy to take my place at the desk of the cellular range and can be an essential place of retreat in the office or hotel lobby. In the hospitality sector, I team up with the break bistro table for a relaxing time-out. When it comes to meetings - or sharing a snack - the innovative team mobile table and the 4more. 4last.4less. folding table are quick to help.
