hero plus

brunner hero plus | Roland Schmidt Design

hero plus is a chair that stays in line – and still stands out. That's because of its intelligent connecting mechanism, which works both armrest to armrest or as a mutual linking system, and is therefore equipped to be panic-proof. An ideal solution for providing sufficient design options and ensuring there is perfect order in large halls. And when the chairs are no longer needed, their reduced stacking height is helpful, as up to 20 chairs can be stacked together.
