

Cord Lamp

Cord is a family of hanging lamps, available in two dimensions, consisting of two spherical caps made of striped mouth-blown glass connected by a metal link, matt varnished in black color. The lower glass is always transparent, while the upper one is colored in three precious hues, amethyst, emerald green and avio blue: the alternation of color and transparency makes this lamp a unique object, capable of mixing tradition and contemporaneity and giving the user a warm and embracing light effect.

Features

- Available in two dimensions
- Diffuser made up of two cups in striped mouth-blown glass and metal components creating a two-tone sphere
- The lower part is always transparent, while the upper one is made of polish coloured glass
