

Juli Plastic

The Juli Plastic armchair is an ever improving range as new options and models are added based on successful experiments and experience. The most recent addition is a removable seat cushion equipped with a non-slip base. The curved shell envelops the user, offering extreme comfort, while the range of bases offers a great deal of customisation - from swivel base to wooden legs or the elegance of a metal sled base.

Features

- Fashionable, rich colour palette of finishes
- Removable seat cushion in fabric with an anti-slip surface underneath as an optional accessory
- ANSI BIFMA X5.1:2017 certification

Design by

Werner Aisslinger
