

Openup

Openup, a collection of tables praising purity and lightness, floating between eternal balance and constant collapse. A sensual game of lines, details and shadows makes the table suitable for a dining room of a large mansion or even for modern and unconventional living areas. Simple yet complex, it is made of a base of laser-cut painted metal and a top in ash plywood.

Features

- Available in different sizes and shapes
- The extreme formal synthesis is also apparent in the colours, white and black, symbols of the most contemporary vision
