

Framery 2Q

The full-size meeting room

Framery's new model, 2Q office booth is designed for 4-6 people. It's the best place to co-create, brainstorm and have meetings, with the fraction of the cost of building a separate meeting room. Our superior sound insulation system ensures that your meetings won't disturb the office – and the office noise won't disturb you.

Framery 2Q is available in three different interior layouts:

Framery 2Q Standard

You can choose Framery 2Q without furniture, leaving you the option to furnish it the way you like. The superb sound insulation ensures you and your team total sound privacy and the adjustable airflow creates a happy atmosphere to work in. The power column is a fixed component with 3 power sockets + Twin USB fast charger and provides an option for a display bracket or a whiteboard. A low doorstep makes this product wheelchair accessible.

Framery 2Q Standard with table

A meeting table with two different height options makes this layout optimal for laptop use or some creative workshopping. A sofa is also available for a more relaxed approach. This model comes with automated LED lighting and 4 power sockets + Twin USB fast charger + HDMI that are located on the table. The power column is a fixed component and provides an option for a display bracket or a whiteboard. The product is also wheelchair accessible due to its low doorstep.

Framery 2Q Lounge

Bring the living room in your office with Framery 2Q Lounge. This layout includes custom-designed L-shaped sofa, two whiteboards and a wall shelf. The new furnishing provides a more casual environment for company meetings, a calm space to retreat to during the work day, or an area for socialization. Increase functionality of the pod by attaching a display screen or TV on the wall opposite the sofa. Additional options include light-weight free-standing, floating tables to make for a more comfortable, ergonomic work space.
