

Circa

by Pablo Designs

Pablo Studio | 2013

The Circa range from Pablo includes a desk lamp, a floor standing lamp and hanging ceiling lights. Circa's LED disc is connected to the stem with a joint that enables 360° rotation and a 45° tilt. This allows the user to position the light exactly where they want, while touch sensitive controls provide three levels of brightness from the LEDs. The floor and desk lamps include a USB port for charging peripherals, ideal for the touchdown worker.
