HAWORTH®

RWE Deutschland AG Westnetz, Dortmund

Westnetz is a subsidiary of RWE Deutschland AG and operates the distribution system supplying gas and electricity to the western parts of Germany. More than 5,000 members of staff ensure a reliable power supply across 195,000 kilometres of electricity lines and 26,000 kilometres of gas pipelines. In order to provide contemporary offices for the 700 colleagues at its Dortmund service centre, the company embarked on an ambitious upgrading and refurbishment project.

Following a tendering process, Haworth was able to clinch the contract against four high-profile competitors, with its integrated product range and a convincing design proposal that offered innovative solutions for the central areas of the eleven-storey building.

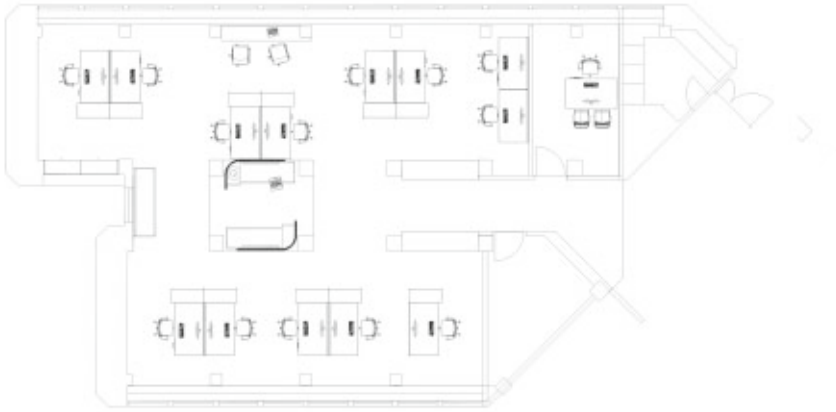

The key objective of the project was to create an improved office environment that would support staff productivity. This was to be achieved through new workspaces with flexible furniture elements, increased networking spaces and a design that facilitates communication. Furthermore, the brief envisaged increased desk sharing.

The project created 550 new dedicated workstations for 700 members of staff. The lounge areas were equipped with versatile and flexible LTB elements in a variety of different configurations and combined with MeetYou partitions, while comfortable Hello seating units add design accents to the arrangement. For the meeting rooms, Planes conference tables were chosen, together with Comforto 99 seminar chairs, while Comforto 1 stools can be used for shorter, less formal meetings, and to offer a sit-stand alternative for desk workers.
