

HAWORTH collection

1006 Navy emeco

Seating

Built to withstand sailor life on submarines, the Navy chair has been in continuous production since 1944. Craftsmen use the original 77-step process that includes forming recycled aluminum by hand, welding, tempering for strength, and anodizing for a durable finish. Choose from side chairs, mini chairs, stacking chairs, or two heights of stools. Available with or without arms.

Features

- Frame and seat made from 80% recycled aluminum
- Felt or plastic glides available
- Optional recycled PET felt seat pad
- Hand-brushed, clear-anodized finish suitable for outdoor use
- Part of a larger collection of Navy seating
