Mater Cube

Coffee shell waste or wood waste mixed with recycled industrial plastic

The Mater Cube is made of our circular waste material Matek® and an inner frame of FSC® certified wood. Innovative technology allows us to recycle fibre-based waste materials with industrial plastic waste from Grohe in the Matek® material. The Mater Cube is available in different variants with Matek® blends of either coffee shell waste or wood waste mixed with industrial plastic waste. The Mater Cube has several uses, limited only by imagination - side table, stool, plant stand, etc.

Mater Sustainability Factsheet

Matek®

In alliance with large corporations, Mater explores new technology that recycles industrial fibre and plastic waste. This results in five new unique patented materials under the name Matek®.

FSC® Certified wood

From the outset, our ambition has been to use FSC-certified wood in our production. This is now implemented with small exceptions. In an FSC® certified forest, no more trees than the forest can reproduce are felled, so the exploitation of nature is avoided.

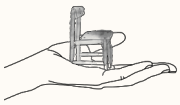
CO_2 Footprint

At Mater, we believe in the importance of transparency. By doing Life Cycle Assessments (LCA) on our furniture, we can analyse the total climate emission for each of our product's lifespan.



Mater Take-Back

We unhesitatingly offer to take all our furniture made from Matek® back at the end of its life to recycle it into new furniture.
