**Cicognino** Cassina

Table

Originally designed by Frano Albini to support his elderly mother as she transported full teacups to guests without spilling a drop, Cicognino—or “little stork”—is all at once witty, refined, and reassuringly stable. One leg of the essential tripod design extends up into a handle for easy mobility and enhanced balance. Attention to detail and an unusual yet familiar shape make Cicognino a highly expressive piece that plays well in any context.

#### Features

- Easily portable tray-like design
- Solid wood three-leg structure with extended handle
- Veneered plywood tray top trimmed in solid wood
