

Monitor Arms

Adjustable monitor arms by Haworth and Ergotron® enable precise positioning of monitors, TVs, and tablets for greater productivity and ergonomic comfort. With a diverse, user-focused selection, the monitor arms enhance flexibility, encourage collaboration, and promote well-being. They support single or multiple displays, free up worksurface space, and help work flow efficiently.

HAWORTH®

Flexible, Easy, Ergonomic

Simple to install, these monitor arms can attach to just about any table or desktop. They are also simple to use, offering quick, responsive adjustments that give users greater control of their work environment.

Features

The broad offering of monitor arms supports a wide variety of user needs with an array of adjustable choices. A variety of single and dual monitor arms is available for side-by-side displays. Add Ergotron extension arms to accommodate three or four monitors. C-clamps further broaden application possibilities.

Sleek, streamlined design – Fits well in a range of work environments.

Ergonomic support – Helps reduce eye, neck, and back discomfort.

Smooth extension and retraction motion – Allows users to easily position monitor arms with one touch.

Full adjustability – Lets users work in the most comfortable position with adjustments for height, tilt, rotation, and pan.

Lift-and-pivot motion technology – Provides years of trouble-free adjustment.

Compact retracted position – Stays out of the way, even in tight spaces.

Integrated cable management – Routes cables under the arm, out of the way to help reduce clutter and free up worksurface space.
