Conference Seating

Organizations are tasked with activating space and optimizing products to flex with evolving needs. They require smart, multi-use, and agile products that can quickly reconfigure to improve efficiency while supporting the diverse ways people work. Organizations need solutions that adapt and respond efficiently to help people stay effective.

Designed by Haworth Design Studio and brodbeck design, Bowi® conference seating provides the freedom and flexibility to go anywhere people need seating on a moment's notice. Its clever mechanism allows for an easy tilt of the seat to store multiple chairs in minimal space. Bowi nests neatly, and when you're ready to sit, just click the seat securely into place.

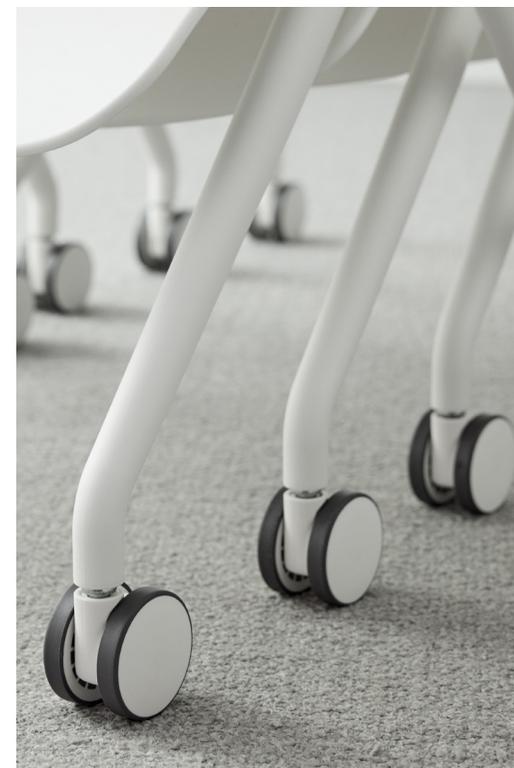

Multiply & Minimize

Bowi conference seating was designed to address organizations' increasing need for space and flexibility. Chairs on casters simply tip forward and roll together, nesting for easy, compact storage. Nest as many chairs together as you want—you're only limited by the amount of space you have.

Move It & Use It

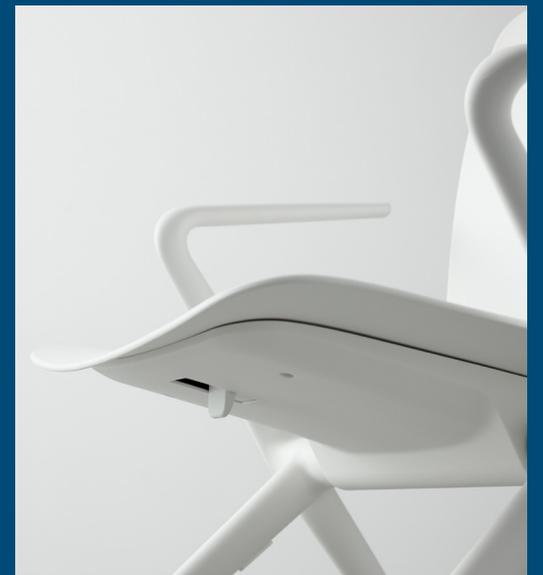

Bowi conference seating is a versatile solution with a simple aesthetic for a range of environments—from conference rooms to cafeterias and meeting areas to project spaces. Just roll Bowi wherever you need it.

Click & Sit

Bowi is a unique nesting chair with a one-piece seat shell that tilts forward for storage. Then, when you need it, the pivoting mechanism easily locks into place with a reassuring click that signals you're ready to work.

Aligning People and Space for Optimal Performance

Your people, organization, and facilities are at the center of everything we do. We help create spaces that solve for your business needs—resulting in effective people and efficient use of real estate.
