

# Veda™ by Daniele Gollinucci

## Care and Maintenance Instructions

### Veda Chair Mesh

Veda features a soft-to-the-touch, flocked mesh. When you receive your chair, the flocked mesh may be compressed; this is a result of the care and packaging that we add to protect the chair during transit. To release the compression, simply spray with water or wrinkle releaser and rub the area with a clean cloth, or your hand.

### Veda Chair Plastics (framework, arm caps, base and casters)

Do NOT use oil-based cleaners

Spray or wipe with warm water and a mild detergent (10%) solution to remove most soiling. A soft bristle brush can be used to remove heavier residue. Always use a clean, white cloth and clean water to remove any residue.

Do NOT use a hard bristle brush, as this may damage the surface of the plastic.

### Veda Chair Metal (base)

Warm water and a mild detergent (10%) solution will remove most spills and soiling.
