## Podcast Startup Be\_Hold Storage

Creativity flows through this space, courtesy of lower screens. While offering some privacy and separation, they allow for impromptu conversations and collaboration sessions among the greater group to capture those “aha” moments that can happen anytime. When users are turned away from one another, they signal it’s time for heads down work. A unique configuration provides shared space on the ends for working through recorded material.

### Helpful Tips

**Maximize space** with under-workstation storage with full extension slides.

**Dampen and absorb** sound for private conversations and recording purposes, with acoustical BuzzSpace screens and booths.

**Storage for documents and personal items** is provided by drawers and open cabinets.

**For a premium aesthetic** and unique design touch, specify textured laminates.

**Add a pop of color** or complement surroundings with designer painted pull options.

**Make the design more affordable** with an inset case back for pieces not visible from the back. (Full proud back also available.)

# HAWORTH

## Accounting Firm Be\_Hold Storage

Reimagining a traditional application, this space combines a sophisticated palette and rich-feeling materials. Higher glass screens create an upscale look while separating the four workstations to provide privacy and focus for heads-down work. Drawer storage accommodates archival files, while open storage provides desktop convenience and places for personal belongings.

### Helpful Tips

**Create a smart balance of active and archival storage with a combination of drawers and open storage elements.**

**Make file drawers more personal** and customized by adding accessories.

**Promote movement** and position changes with Planes® and Hop® single-stage height-adjustable tables.

**Maximize efficient use of space** with 16"-deep storage and unique accessories that allow for height-adjustable table integration.

**Add storage and space division** with a breadbox for personal items.

## University – Student Library/ Resource Center

Be\_Hold Storage

A large bar-height Cultivate™ table at the center of this space provides a place for people to gather. Here, students can perch on a stool to study or collaborate with others on a group project. A mix of drawer and door storage along the wall provides options for books and flat paper items to support a full range of resources. The lounge area is ideal for settling in with a good book or socializing with friends.

### Helpful Tips

**Create endless configurations** with modular components that can be mixed and matched as group needs change.

**Design scalability** is created by cases and fronts mixed and matched in different colors.

**Make efficient use of vertical space** with upper stack-on units.

**Add temporary personal storage** for meetings, collaboration, and group projects with bag hooks on the center Cultivate table.

## Video Game Development Be\_Hold Storage

This space is ideal for developers to test video games and other digital technology. The large screen allow for maximum visibility and can be used to host employee and client presentations. Under-screen storage cabinets hide games, headphones, controllers and other electronic equipment, while keeping it close at hand. Lounge furniture provides a comfortable place for testers to try out the games and sit for long periods of time. PopUp™ tables along the back provide a spot for coworkers to sit, watch, critique, and take notes. The side credenza is ideal for storing serving ware for guests.

### Helpful Tips

**Build design consistency** with the Be\_Hold line's wide selection of products for spaces across the entire open floorplan.

**Create warmth and variety** with residential features, such as legs on the credenza and contrasting finishes.

**Keep walkways open** in a smaller space with sliding-door credenzas.

**Design scalability** is created by cases and fronts mixed and matched in different colors.

**Support flexibility** with mobile elements, such as PopUp tables.

## Newsroom Be\_Hold Storage

This benching application provides a quick touchdown spot for field reporters who need a home base while in the office. Vertical elements provide ample storage, even in a small footprint. The open bookcase on top offers easy-access active storage, while drawers on the bottom hide items away when not in use. Rich finishes options add an inviting touch that welcomes busy journalists and makes them feel at home.

### Helpful Tips

**Do more with less** using vertical towers that create territorial boundaries, while providing personal storage space.

**Create functionality for visual cues** with tackable screens and markerboard options on towers.

**Add more temporary storage** for personal items, like bags and sweaters with the worksurface-to-storage bracket with hook.

## Health Food Company Be\_Hold Storage

Here, a healthy lifestyle is encouraged and supported with an outdoor area for respite, yoga, or additional meeting space. Lockers are provided for employees to store athletic equipment and personal belongings. Sliding door and drawer cabinets store health food samples to be distributed, as well as client and vendor files.

### Helpful Tips

**Support flexible, efficient workspaces** in a smaller footprint with sliding door credenzas and slim mobile pedestals.

**Create a softer, warmer aesthetic** with mixed materials and finishes.

**Add a pop of color** with a pedestal top liner.

**Keep resources and tools nearby** with easy access for all using lateral files.

**Provide storage for unassigned spaces** with a bank of lockers for personal items.

## Architecture & Design Firm Be\_Hold Storage

In this office's heads-down workspaces, bench-style desks and mobile storage provide designers with flexible support for the changing needs of their creative work and adaptive processes. Lower dividers separate each desk—in markerboard laminate for sketching and quickly capturing ideas—allow conversation to flow freely. Cushions on storage help facilitate touchdown meetings to review materials or make quick decisions to keep projects moving forward.

### Helpful Tips

**Maximize space** with multi-functional solutions that not only serve as personal storage, but also space division.

**Create secondary seating** by adding cushions to storage tops.

**Provide tools for creative externalization** with markerboards on nooks.

**Keep the space flexible and adaptable** with mobile credenzas that allow easy reconfiguration.

**Organize papers, books, etc.** in an open cabinet with a C-Cubby.

## A&D Collaboration/Meeting Space Be\_Hold Storage

The hub of the Architecture & Design office, this multipurpose space is designed to be used for meeting and collaborating, as well as a heads-down workspace to spread out drawings away from the rest of the team. The center functions as a more formal meeting space, while the banks on either side not only offer storage, but additional touchdown points or surfaces for serving clients within the space.

### Helpful Tips

**Customize functionality** to support a full spectrum of activities throughout the day with Be\_Hold's breadth of variety and choice.

**Divide space** in open-plan environments with modular elements that also provide functional storage and a finished look on all sides.

**Create meeting areas** with Be\_Hold elements and durable high-pressure laminate common tops.

**Add a stationary storage area** for people who move throughout the space to accomplish various tasks and activities using lockers, available in various heights to make use of vertical space as needed.
