X Series

Recycling Solutions

X Series® recycling solutions help people organize and manage recycling and waste, contributing to corporate sustainability efforts. Smaller bins can be integrated and hidden away within workspaces, and larger bins can be enclosed in readily accessible collection stations for group use. With steel-core construction and an easy-to-clean acrylic overlay, the collection station features a sleek, durable design that is perfect for public spaces.

Certifications

- BIFMA LEVEL 3 Certified
- GREENGUARD Certified
- May Contribute Toward LEED Credits

Features

- For community spaces, breakrooms, individual workspaces—anywhere recycling management is needed
- Freestanding stations are painted steel and are fully assembled and equipped with three 11"x16" openings and three easily removable Rubbermaid 23-gallon bins
- Two non-locking swing doors provide quick access to bins
- Clean aesthetic coordinates with other X Series storage products and works in any environment
- For individual workstations, the recycling/trash bin can be suspended from hanging rails in lateral file drawers and pedestals, or from the recycle bin carriage
