

Upside Standard Range Height Adjustable Table

The Upside® height adjustable table family is NOW AVAILABLE in a standard height range model.

Features:

- Standard Range (single stage) base adjusts 27.4" - 46.6" in height
- Built-in Gyro-sensor collision detection technology
- 250-lb. dynamic load capacity
- Supports worksurface-mounted screens, monitor arms, and security drawers
- Wire management options available
- Choose the simple up/down paddle control or a programmable paddle with OLED display for the ability to set height preferences and reminders to move
- T-leg and C-leg height-adjustable bases both have flat, steel feet with mitered edges
- Bases may be purchased separately for use with existing surfaces
- Rectangle top in 23" or 29" depth and 46", 52", 56", 64", 70", 76", or 82" width
- Worksurfaces available in all standard high-pressure laminates and premium veneers
- 20 base colors available for standard domestically assembled models
- Three base colors available for Value Models
