# Compose Echo

Workspaces

The future of work is in motion. Complex problem solving and activity-based work is requiring people to quickly move between focus work and collaboration. This drive for effective, adaptive workstyles has led to neighborhood planning that optimizes real estate. When people are an organization's most valuable asset, it is essential to create comfortable spaces that give them control over where and how they work.

Compose<sup>®</sup> Echo is a scalable workplace system that redefines flexibility, creating dynamic team spaces where both individual and collaborative work happen fluidly. Each element was thoughtfully designed to fit together to maximize space and human performance, with the freedom to easily switch between work modes. Compose Echo moves the way you do, to support a variety of workstyles now and respond to workplace needs of the future.

## Freedom to Change

Compose Echo maximizes space utilization through applications to accommodate project-based work in an open plan. This progressive approach redefines flexibility by intently building mobility into each product for more opportunities to adapt to diverse workstyles, changing cultures, and new ways of working. It provides assurance that the workplace will continue to respond to future needs, allowing you to adapt your space while re-purposing existing furniture.

## Make It Yours

Compose Echo provides the power of choice to craft your own environment. The scalable, modular product line can be dressed up or down with optional features and tools that support quick and easy shifts between individual and collaborate work. With a cohesive kit of parts and an intuitive design made for movement, Compose Echo empowers organizations to place value on what is most important for their people and spaces with personalization and flexibility for everyone.

## Space That Moves with You

Compose Echo proves two worlds can coexist in one open-plan floorplate, creating active spaces for active people. With mobile elements and a design made for movement, Compose Echo lets people fluidly maneuver and shift between individual and collaborative workstyles to support the dynamic range of work activities required throughout the day. Quick, easy, intuitive movements also provide the flexibility to change posture and position whenever needed to support personal preferences, comfort, and well-being.

## Design Choices

Compose Echo creates high-performing, flexible workspaces that don't sacrifice design. Warm, inviting shapes, colors, textures, and materials create an emotional connection that helps people feel comfortable. Retaining the promise of our Integrated Palette™, Compose Echo is highly scalable and everything within the portfolio is retrofittable with existing Compose installations.

### **Haworth Design Studio**

Our international team of designers collaborates with research and development partners to create multi-generational products and global platforms—with regional needs and preferences in mind.

## **Aligning People and Space for Optimal Performance**

Your people, organization, and facilities are at the center of everything we do. We help create spaces that solve for your business needs—resulting in effective people and efficient use of real estate.
