

Neurodiversity CEU Course Details

Course Title

Understanding Neurodiversity in Education: Supporting Sensory Needs on Campus

Course Numbers

AIA Course #: HAW-1000 – HSW 1 LU/Intermediate
Project Planning & Design/Building Design

IDCEC Course #: CEU-121336 – HSW 1 LU/Intermediate
Subject Code: 3. Interior Design Education/1. Instruction

Course Description

This course offers a comprehensive exploration of neurodiversity and its implications for learning and teaching environments. Participants will gain insights into the principles of diversity and inclusive design, learn about the unique challenges faced by neurodiverse individuals, and understand the critical role of sensory systems in shaping campus experiences. Through practical design ideas and strategies, attendees will discover how to create environments that are inclusive and supportive of neurodivergent faculty, staff, and students, ultimately fostering a more diverse, productive, and harmonious campus.

This 1-hour course will equip participants with essential knowledge and practical strategies to understand and support the sensory needs of neurodiverse individuals on campus, fostering a more inclusive and productive environment.

Learning Objectives

1. Learn about diversity and inclusive design and its importance in the campus
2. Understand what neurodiversity means and the potential roadblocks neurodiverse individuals may encounter
3. Learn how the sensory system relates to neurodiversity and how we can view environments through sensory interactions
4. Review design ideas to create an environment that is inclusive to individuals who are neurodivergent
