HAWORTH®

Circular Services

Find new use for product your organization no longer needs.

As a values-driven company that believes business should be a force for good, finding new ways to support a more circular business model is an essential part of our strategy. We explore environmentally preferred solutions that drive environmental stewardship, economic growth, and community prosperity.

Aligned with our zero waste to landfill commitment, we partner with our dealer network and customers to capture the highest value options for used furniture – often through remanufacturing or charitable donations – with recycling considered as a last resort.

The Haworth Program

We work alongside customers to find the optimum solution. Our program is designed to suit large and small projects. All strive for the following results:

- >80% of components that cannot be repurposed are recycled
- Less than 1% of removed office furniture go to landfills.

Program Opportunities

Comprehensive Decommissioning Partner

WHY: Build a stronger community by partnering with Haworth and our certified dealer network to uncover opportunities for products you no longer need to be donated to organizations that could benefit. Develop and implement circular solutions that may entail product donation and/or recycling. If engaged early, the cost can be competitive with traditional decommissioning, while delivering metrics, transferring title ownership, and creating a landfill-free solution to share and inspire others.

HOW: Connect with your Haworth representative or local dealer partner.

Local Recycling

WHY: Recover scrap value of materials and keep product out of landfills. This solution involves the lowest cost yet is the least beneficial to the environment.

HOW: Connect with your Haworth representative or local dealer partner to source a provider who can process used furniture. Access disassembly/recycling instructions by referencing the product pages on Haworth.com.

Haworth Take-Back

If all higher value options have been exhausted or are unavailable regionally, Haworth will support our customers in their commitment to keeping our product out of landfills. Started as a program for task chairs, we have expended the scope to include all Haworth products.

WHY: Haworth has had a strong commitment to keeping valuable materials out of landfills, and offers this as a courtesy to like-minded customers.

HOW: Customers can send product back to Haworth's global headquarters, at their cost, to be responsibly recycled.

Whether you're looking to resell, trade in, donate, recycle or send back product no longer needed, our Circular Services program provides tangible results. Our program centers on crafting an aligned strategy for our customers with solutions that are environmentally preferred and economically feasible.

To start the process of developing the circular service that's right for your project, locate and contact a Haworth Showroom or Dealer near you.

Haworth's Circular Services program is part of our Sustainability Strategy, grounded in our Values and focused on three areas:

People & Community

Circular Economy

Operational Performance
