

A Series

Storage

With countless options, A Series storage creates a consistent, coordinated, and customized look throughout a space. A Series complements a wide range of environments to organize and manage the variety of ways people work.

A Series® storage is manufactured in a zero landfill, ISO 9001 and ISO 14001 certified facility in Big Rapids, Michigan and is transported in freight vehicles with optimized volume for efficient use of loading space. When a product reaches the end of its useful life, customers and partners are encouraged to avoid landfilling and instead pursue second life options.

Impact by Life Cycle Stage

Material Chemistry

Haworth is committed to providing our customers with products that support safe and healthy environments. We are working diligently toward the ongoing reduction of hazardous chemicals associated with parts and materials we source, as new safer alternatives become commercially available.

These include, among others, PVC, benzidine dyes, hexavalent chromium, certain hazardous phthalates, PBDE flame retardants, and those chemicals known to contribute towards ozone depletion.

We are committed to achieving our goal of being transparent with our customers on our progress.
