Tips and Tricks - Collaborative Spaces

Where people come together for group conversations, formal meetings, breakout sessions, and casual chats

- Be mindful of whether individual spaces face toward or away from each other and adjacent benching areas.
- Consider multiple sets of Plume 3 screens for flexibility and configurability.
- Use Plume screens to break up open spaces into smaller group work areas.
- Be mindful of activities in spaces next to screens to help people on both sides maintain focus.
- Offer choices to workers with a mix of individual nooks, casual spaces, and assigned benching areas.
- Repeat a row of booths or desks to enclose the front and back of spaces.

Additional items to consider:

- Openest is not recommended for frequent relocation. Plan to install at final location.
- Openest is not meant to beuser relocated. Assembled product must be moved by professionally trained installers.
- Verify power and data locations. Access Flooring allows power and data to be easily located at installation site.
- Workware Wireless is the recommended technology solution, requires building power and data at the installation location.
- When designing a floorplate; plan for various privacy needs.
- Finish spaces with appropriate accessories. Please refer to the Product Details section or Price Book pages by component for accessory options.
Tips and Tricks - Thinking Spaces

Private spaces that provide a retreat for thinking, research, focus, and strategic conversations.

- Use Openest components to add interest with functional and inviting spaces.
- Combine lounge pieces with workware™ technology solutions to lend a casual feeling to group workspaces.
- Use Chick Poufs to create inviting spaces where people can work in various postures.
- Take advantage of the integrated hideaway power to support mobile technology.
- Consider 5’ of space between each booth or desk to maintain visual geometry and allow easy circulation.
- Leave breathing room between Plume screen sets to enhance the landscape.

Tips and Tricks - Touchdown Spaces

Unassigned spaces for mobile workers, visitors and quick or casual collaborations.

- Plan screen placement strategically, leveraging existing walls to help enclose spaces or create sitting areas on both sides of a single screen.
- When placing screens, consider whether you want to allow or block sunlight.
- Use a set of Plume 9 Screens with a table to enclose a small group area.
- Keep acoustics in mind when incorporating screens as they can provide some acoustical privacy.
- Add a Conference Booth with workware™ technology to support impromptu meetings and collaboration.
- Plan 5’ of space between booths and desks to maintain visual geometry and allow easy circulation.

Additional items to consider:

- Openest is not recommended for frequent relocation. Plan to install at final location.
- Openest is not meant to be user relocated. Assembled product must be moved by professionally trained installers.
- Verify power and data locations. Access Flooring allows power and data to be easily located at installation site.

- Finish spaces with appropriate accessories. Please refer to the Product Details section or Price Book pages by component for accessory options.
Tips and Tricks - Social Spaces

Casual areas where people come together for social conversations and refreshments.

• Use screens or booths to form cozy settings for casual collaboration.
• Combine two Double Booths with two round tables to create a restaurant-style environment.
• Mix Openest lounge pieces with existing architecture elements to divide areas.
• Use a set of Plume 3 Screens to shield a group area from activities in the room.
• Blend Chick Poufs with sofas and screens to create relaxed settings for conversations.
• Place two or three Chick Poufs around a table for quick drop-in meetings.

Plume Screens
Screens are made of compression formed, non-woven polyester fiber, with polyester fabric laminated to the front and back. Bases are powder coated 0.250” thick CRS plates with 0.56” diameter pins that when fully assembled, protrude into the bottom of the screen. Connectors are a combination of: powder coated aluminum, powder coated steel, zinc plated steel, and synthetic rubber O-rings.

Feather Sofa
Upholstered seats and backs have plywood frame construction. Multi-density molded foam and Sytex webbing is used to achieve seating comfort. Varying types of polyester blended fabrics are used in combination with lofted polyester fiber conjugate for final covering. Vertical sofa support is established through use of powder coated die cast aluminum legs, containing 95% recycled material and black ABS glides.

The Feather Sofa can be ordered with an optional table composed of; 100% recycled wood content CARB compliant MDF, clear low gloss finished white oak, or clear low gloss finished walnut. Vertical table support is established through use of a powder coated die cast aluminum leg, containing 95% recycled material and a black ABS glide.

Chick Pouf

Chick Pouf – Base (Included with Chick Pouf with Back and without Back)
The Chick Pouf Base (with or without Back) features an upholstered seat which is made of plywood frame construction. Multi-density molded foam and Sytex webbing is used to achieve seating comfort. Varying types of polyester blended fabric are used in combination with lofted polyester fiber conjugate for final covering. The base pivot mount is made of 0.250” thick CRS with 0.628” diameter CRS pivot pins and bolts directly to the base frame. The pivot spacer between the back and base is powder coated die cast aluminum containing 95% recycled material. Bottom closeout cover is 0.060” thick black ABS. Glides are black nylon and thread into the base.

Chick Pouf – Back (Included with Chick Pouf with Back)
The Chick Pouf flip down back is composed of a high-density polyethylene inner shell with a 0.312” diameter CRS welded wire inner frame. This shell is over-molded with polyurethane foam. Varying types of polyester blended fabrics are used in combination with lofted polyester fiber conjugate for final covering. A two-inch polypropylene strap is sewn in location to assist with positioning the back.

Chick Pouf – Large Square – No Back
Features an upholstered seat which is made of plywood frame construction. Multi-density molded foam and Sytex webbing is used to achieve seating comfort. Varying types of polyester blended fabric are used in combination with lofted polyester fiber conjugate for final covering. Bottom closeout cover is a black fabric. Optional Glides are black nylon and attached with a fastener into to the base. Felt pads can be selected. Optional caster are also available in hard or soft versions.

Chick Pouf – Rectangle – No Back
Features an upholstered seat which is made of plywood frame construction. Multi-density molded foam and Sytex webbing is used to achieve seating comfort. Varying types of polyester blended fabric are used in combination with lofted polyester fiber conjugate for final covering. Bottom closeout cover is a black fabric. Optional Glides are black nylon and attached with a fastener into to the base. Felt pads can be selected. Optional caster are also available in hard or soft versions.

Chick Pouf – Round – No Back
Features an upholstered seat which is made of plywood frame construction. Multi-density molded foam and The webbing is plastic over fiberglass used to achieve seating comfort. Varying types of polyester blended fabric are used in combination with lofted polyester fiber conjugate for final covering. Bottom closeout cover is a black fabric. Optional Glides are black nylon and attached with a fastener into to the base. Felt pads can be selected. Optional casters are also available in a soft breaking versions.

Sprig Table
Sprig Tables are available in three different types of wood; 100% recycled wood content CARB compliant MDF, clear low gloss finished white oak, and clear low gloss finished walnut. Vertical table support is established through use of powder coated die cast aluminum legs, containing 95% recycled material and black ABS glides.

Desks
Desk screens are made of compression formed, non-woven polyester fiber, with polyester fabric laminated to the front and back. Connectors are a combination of; powder coated aluminum, powder coated steel, zinc plated steel, synthetic rubber o-ring, and ABS. Framing consist of 16 ga. CRS powder coated tubing and die cast aluminum. Adjustments are made using steel cored polypropylene levelers. Work surface top construction: Standard core consists of 1.125” thick particleboard. Laminate top face is 0.028” thick high-pressure laminate and underside is 0.028” thick backer for balanced construction. Veneer top face is 0.020” thick natural or recon veneer and 0.020” thick backer for balanced construction.

Edges for laminate tops: Edge options include 0.118” thick edge band made of Acrylonitrile Butadiene Styrene (ABS); knife edge (on Green core only), constructed with 0.0118” thick edge band that runs 0.375” down the perimeter of the edge before transitioning to a taper; 0.118” thick T-mold and 0.625” thick contoured (Cascade) plastic t-mold. Connectors are a combination of; powder coated aluminum, powder coated steel, zinc plated steel, synthetic rubber O-ring, and ABS. Framing consist of 16 ga. CRS powder coated tubing and die cast aluminum. Adjustments are made using steel cored polypropylene levelers.

Work surface top construction: Core options include Standard and Green core. Standard core consists of 1.125” thick particleboard. Green core is constructed of 1.125” thick medium density fiberboard (mdf). Laminate top face is 0.028” thick high pressure laminate and underside is 0.028” thick backer for balanced construction. Veneer top face is 0.020” thick natural or recon veneer and 0.020” thick backer for balanced construction.

Edges for laminate tops: Edge options include 0.118” thick edge band made of Acrylonitrile Butadiene Styrene (ABS); knife edge, constructed with 0.0118” thick edge band that runs 0.375” down the perimeter of the edge before transitioning to a taper. Edges for wood tops: Edge options include 0.100” thick wood edge band; knife edge, constructed with 0.100” edge band that runs 0.375” down the perimeter of the edge before transitioning to a taper.

Booth seating is made of plywood frame construction. Multi-density molded foam is used to achieve seating comfort. Varying types of polyester blended fabrics are used in combination with lofted polyester fiber conjugate for final covering.

Great Expectations

You have them as a Haworth customer and so do we. And because we value our customers, we cover our products with the Haworth North America Product Compatibility and Limited Warranty Policy.

Product Compatibility and Limited Warranty Policy

Our Commitment To Product Compatibility – Integrated Product Platforms
As a market leader in the design and manufacture of workspaces that adapt to change, we strive to maintain product compatibility within our various generations of integrated product platforms. This benefits the customer who desires to update or modify their work environment. It also benefits the customer needing to replace a product due to damage or other reasons but which is no longer manufactured or is otherwise unavailable, such as a fabric or finish that is discontinued because of changing market preferences. In both circumstances, we often can provide products with comparable function and performance.

Our Commitment To Product Quality – The Haworth North America Limited Warranty
To ensure customer satisfaction and peace of mind, we stand behind our products with the Haworth North America Limited Warranty. To review the current version of the limited warranty including its terms and conditions, please go to: www.haworth.com/resources/product-info/warranties or contact Haworth’s First Call Center at 800.426.8562.

Warranty Requests or Questions
For questions or service requests pertaining to the Haworth Limited Warranty, please contact your Haworth dealer. If you are unsure who your dealer is, please call Haworth’s First Call Center at 800.426.8562.

Effective: January 1, 2020
