- Seat height adjusts 5’ (127mm) from 16.5” (406mm-533mm) in standard models. Low-position adjusts from 15” to 17.5” (38mm-44mm).

Benefits:
- Ensures the comfort of the lower limbs by avoiding pressure on the underside of the thigh caused by a seat pan that is too high, or decreased thigh-to-torso angle if the seat is too low.
- Accommodates users between approximately 4’11” (1499mm) and 6’3” (1905mm) tall to provide good leg circulation.
- Seat height adjustment is important in setting the proper hand position and allowing for proper sitting eye height as well.

Benefit:
- Supports the thighs, allows users to rest against the seat back for back support, and avoids pressure on the back of the knees of small to tall users.

Balanced 3-Point Tilt

Features:
- Balanced 3-point tilt mechanism.
- Back reclines 24° from the upright position.
- Seat pan moves downward 5° from the initial position.

Benefits:
- Comfortable relaxed posture.
- Recline allows for the opening of the user’s chest cavity providing good airflow to promote alertness.
- Users’ feet remain flat on the floor.

Tilt Tension Control

Features:
- Regulates the amount of resistance felt when leaning back in the chair and the effort required to recline the chair backwards.

Benefit:
- Personalized support to accommodate users of different body types and different work styles.

Edgeless Back Design

Features:
- Edgeless design provides flexibility.
- Patented design with flexible fronds and cradle system provide total back support.

Benefit:
- Encourages movement, eliminates pressure point from hard edge.

Back Support/ Lumbar Adjustment

• Back reclines 24° from the upright position.  
• Seat pan moves downward 3° from the initial position. | • Comfortable relaxed posture.  
• Recline allows for the opening of the users’ chest cavity providing good airflow to promote alertness.  
• Users’ feet remain flat. |
| **Tilt Tension Control** | • Easy-to-reach and easy-to-activate side-mounted tilt tension control regulates the amount of resistance felt when leaning back in the chair and the effort required to recline the chair backwards. | • Personalized support to accommodate users of different body types and different work styles. |
| **Seat Height Adjustment** | • Pneumatic seat height adjustment.  
• Task chair seat height adjusts 5” (127mm) from 16” (406mm to 533mm) in standard models. Low-position adjusts 14.7” to 18” (373 to 457mm).  
• Task stool seat height adjusts 7.3” (185mm) from 21” to 28.3” (533mm to 719mm).  
• Dual Posture seat height adjusts 17.5” to 24.2” (445mm to 615mm). | • Ensures the comfort of the lower limbs by avoiding pressure on the underside of the thigh caused by a seat pan that is too high, or decreased thigh-to-torso angle if the seat pan is too low.  
• Accommodates for users between approximately 4’11” (1499mm) and 6’3” (1905mm) tall to provide good leg circulation.

• Patented mesh with built in tension zones for added comfort. | • Increases users’ mobility and comfort when reaching sideways for objects. |

General Guidelines for Product Specification

Zody seating specification numbers are based on an alpha-numeric logic that identifies a product by model and certain characteristics.

For example, a product number that reads **SZT-20-702MA5** identifies the product as a Zody mesh back chair with 4D arms, no lumbar, pneumatic seat height adjustment, foam adjustable seat and standard plastic base TR-F black only with hard casters. The numeric logic for this model with fabric and finish codes is shown below:

There are exceptions to this logic; therefore, always refer to the price charts for product numbers rather than attempting to construct them. Product number modification instructions for additional options appear in footnoted copy for each applicable model.

Beyond the printed product number, fabric and finish codes are required to complete an order specification. To communicate your order clearly, list the product number and fabric/finish codes in the sequence outlined on each price page.

COM & COL General Information
To order a COM fabric (Customer's Own Material), contact the Haworth Inquiry Center (1.800.426.8562), your local Haworth dealer, or go to surfaces.haworth.com to find out if the COM you have selected has already been tested and approved. The surface collection site also has information on the Haworth alliance program with Carnegie, Luna Textiles, and Maharam as well as our industry-leading Pre-Approved COM program.

COM fabrics are placed into Grades based on the cost per linear yard. If a fabric’s cost exceeds the range of our highest Grade it will be noted as Non-Graded. The product will be priced at Grade A; the COM fabric costs will appear as a separate line item. The fabric charge will be Haworth's purchase cost plus a 4% administrative fee (based on the cost of the fabric). Yardage calculations will include any applicable fabric repeat.

COM Leather products will be priced at a leather Grade A; COL costs will appear as a separate line item. The leather costs will be Haworth's purchase cost plus a 4% administrative fee (based on the cost of the leather).

- Back reclines 24° from the upright position.
- Seat pan moves downward 3° from the initial position.

**Benefits:**
- Comfortable relaxed posture.
- Recline allows for the opening of the users’ chest cavity providing good airflow to promote alertness.
- Users’ feet remain flat.

**Tilt Tension Control**

**Feature:**
- Easy-to-reach and easy-to-activate side-mounted tilt tension control regulates the amount of resistance felt when leaning back in the chair and the effort required to recline the chair backwards.

**Benefit:**
- Personalized support to accommodate users of different body types and different work styles.

**Seat Height Adjustment**

**Features:**
- Pneumatic seat height adjustment.
- Task chair seat height adjusts 5” (127mm) from 16” (406mm to 533mm) in standard models. Low-position adjusts 14” to 17” (356 to 432mm).
- Task stool seat height adjusts 7.5” (191mm) from 21.5” to 29” (546mm to 737mm).

**Benefits:**
- Ensures the comfort of the lower limbs by avoiding pressure on the underside of the thigh caused by a seat pan that is too high, or decreased thigh-to-torso angle if the seat pan is too low.
- Accommodates for users between approximately 4’11” (1499mm) and 6’3” (1905mm) tall to provide good leg circulation.
- Seat height adjustment also is important in setting the proper hand position and allowing for a proper sitting eye height.

- 3” (76mm) of seat depth range. (Fixed seat also available.)
- Available with conventional foam material or optional Technogel® Soft Lite gel insert.

- Height adjustment accommodates for users with varying elbow rest heights so that users avoid lifting their shoulders or leaning sideways to get arm support.
- Front-to-back adjustment adjusts the armrest length, which is important because it allows users to get close to the worksurface while maintaining the effective use of the backrest.
- Side-to-side adjustment ensures a comfortable resting position for the arms with proper support of the forearm while allowing for easy entry/exit of the chair.

- Seat height adjustment is important in setting the proper hand position and allowing for proper sitting eye height as well.

### Seat Depth Adjustment

**Feature:**
- Optional seat depth has 2.5” (64mm) seat depth range. Fixed seat also available.

- Regulates the amount of resistance felt when leaning back in the chair and the effort required to recline the chair backwards.

**Benefit:**
- Personalized support to accommodate users of different body types and different work styles.

### Forward Tilt

**Feature:**
- Optional forward tilt allows seat pan to move 5° downward from the initial position.
- Forward tilt not available on task stool.

**Benefits:**
• Provides additional support in the lower back.
• Lumbar adjustment maintains the natural curvature of the spine at the lower back and allows the user to position the support to where it is most comfortable.

---

**4D Arm**

**Features:**
• Optional 4D arm adjusts in 4 ways:
  - Height adjustment 4” (102mm)
  - Side-to-side arm cap adjustment range: 3” (76mm) [1.5” (38mm) each arm cap]
  - Front-to-back adjustment range: 3.5” (89mm)
  - Pivoting 20° in and 20° out

**Benefits:**
• Arms support the muscular system of user’s neck and shoulders; proper arm support provides back relief.
• Arms can be an aid in standing or sitting down.
• Height adjustment accommodates for users with varying elbow rest heights so that users avoid lifting their shoulders or leaning sideways to get arm support.
• Front-to-back adjustment adjusts the armrest length, which is important because it allows users to get close to the worksurface while maintaining the effective use of the backrest.
• Side-to-side adjustment ensures a comfortable resting position for the arms with proper support of the forearm while allowing for easy entry/exit of the chair.
• Pivoting provides proper support of the forearm when performing tasks involving keying and mousing.

---

### COM & COL
To order a COM fabric (Customer’s Own Material), contact the Haworth Inquiry Center (1.800.426.8562), your local Haworth dealer, or go to haworth.com/surfaces to find out if the COM you have selected has already been tested and approved. The surface collection site also has information on the Haworth alliance program with Carnegie, Luna Textiles, and Maharam as well as our industry-leading Pre-Approved COM program.

COM fabrics are placed into Grades based on the cost per linear yard. If a fabric’s cost exceeds the range of our highest Grade it will be noted as Non-Graded. The product will be priced at Grade A; the COM fabric costs will appear as a separate line item. The fabric charge will be Haworth’s purchase cost plus a 4% administrative fee (based on the cost of the fabric). Yardage calculations will include any applicable fabric repeat.

COM Leather products will be priced at a leather Grade A; COL costs will appear as a separate line item. The leather costs will be Haworth’s purchase cost plus a 4% administrative fee (based on the cost of the leather).

### Environmental Factors
**Material Off Gassing**
In an effort to ensure air quality standards, all Improv parts suppliers are required to provide Material Data Sheets and/or other documentation, verifying that their products do not emit volatile organic compounds (VOCs). In addition, the powder-coat paint process used in the manufacturing of Improv seating is free of VOCs. Our manufacturing processes have also eliminated all use of chlorofluorocarbons (CFCs) and ozone depleting chemicals (ODCs) in the chair’s construction.

**Recycling**
All fabric scraps are recycled, reducing the amount of material sent to landfills, and all chair components disassemble easily to increase the potential for recycling. In addition, all thermo-plastic parts are 100% reprocessable, and all raw materials used in its manufacturing can be recycled at the end of the useful life of the product. Recyclable parts are identified with the recycle symbol where practical.
General Guidelines for Product Specification

Improv Series seating specification numbers are based on an alpha-numeric logic that identifies a product by model and certain characteristics.

For example, a product number that reads M221-2241 identifies the product as an Improv high-back chair with seamless upholstered outer shell, pneumatic seat height adjustment, upholstered arms, back-lock, and hard dual-wheel casters.

The alpha-numeric logic for this model complete with fabric and finish codes is shown below:

A ninth-digit suffix of the product number will indicate functional option, such as -F for CAL 133 option.

There are exceptions to this logic; therefore, always refer to the price charts for product numbers rather than attempting to construct them. Product number modification instructions for additional options appear in footnoted copy for each applicable model.

Beyond the printed product number, fabric and finish codes are required to complete an order specification. To communicate your order clearly, list the product number and fabric/finish codes in the sequence outlined on each price page.

Finishes and Fabrics

A complete listing of finishes and fabrics for Improv Series desk chairs can be found in the back of the price list.

Finishes and Fabrics

Environmental Factors
Material Off Gassing
In an effort to ensure air quality standards, all X99 parts suppliers are required to provide Material Data Sheets and/or other documentation, verifying their products do not emit volatile organic compounds (VOC). In addition, the powder-coat paint process used in the manufacturing of X99 seating is free of VOCs. Our manufacturing processes have also eliminated all use of chlorofluorocarbons (CFCs) and ozone depleting chemicals (ODCs) in the chair’s construction.

Recycling
All X99 seating fabric scraps are recycled, reducing the amount of material sent to landfills, and all chair components disassemble easily to increase the potential for recycling. In addition, all thermo-plastic parts are 100% reprocessable, and all raw materials used in its manufacturing can be recycled at the end of the useful life of the product. Recyclable parts are identified with the recycle symbol where practical.

COM & COL
General Information
To order a COM fabric (Customer’s Own Material), contact the Haworth Inquiry Center (1.800.426.8562), your local Haworth dealer, or go to haworth.com/surfaces > COM Library to find out if the COM you have selected has already been tested and approved. The surface collection site also has information on the Haworth+ alliance program with Carnegie, Luna Textiles, and Maharam as well as our industry-leading Pre-Approved COM program.

COM fabrics are placed into Grades based on the cost per linear yard. If a fabric’s cost exceeds the range of our highest Grade it will be noted as Non-Graded. The product will be priced at Grade A; the COM fabric costs will appear as a separate line item. The fabric charge will be Haworth's purchase cost plus a 4% administrative fee (based on the cost of the fabric). Yardage calculations will include any applicable fabric repeat.

COM Leather products will be priced at a leather Grade A; COL costs will appear as a separate line item. The leather costs will be Haworth’s purchase cost plus a 4% administrative fee (based on the cost of the leather).

Features and Options

Guest and occasional models feature frames constructed solid hardwood, laminated plywood, laminated hardwood core and premium veneers, or rigid polyurethane.

Office seating models feature an inner frame construction of tubular steel or solid hardwood or laminated plywood or molded plywood. Swivel bases are standard with hard dual-wheel casters.

Exposed wood surfaces are finished with two top coats of pre-catalyst nitrocellulose lacquer for a durable finish. Refer to the appropriate seating model for applicable features and options.

COM & COL General Information

To order a COM fabric (Customer’s Own Material), contact the Haworth Inquiry Center (1.800.426.8562), your local Haworth dealer, or go to haworth.com/surfaces > COM Library to find out if the COM you have selected has already been tested and approved. The surface collection site also has information on the Haworth + alliance program with Carnegie, Luna Textiles, and Maharam as well as our industry-leading Pre-Approved COM program.

COM fabrics are placed into Grades based on the cost per linear yard. If a fabric’s cost exceeds the range of our highest Grade it will be noted as Non-Graded. The product will be priced at Grade A; the COM fabric costs will appear as a separate line item. The fabric charge will be Haworth’s purchase cost plus a 4% administrative fee (based on the cost of the fabric). Yardage calculations will include any applicable fabric repeat.

COM Leather products will be priced at a leather Grade A; COL costs will appear as a separate line item. The leather costs will be Haworth’s purchase cost plus a 4% administrative fee (based on the cost of the leather).

General Guidelines for Product Specification

Seating specification numbers are based on a numeric logic that identifies a product by model and certain characteristics.

For instance, a product number that reads SAS-22-A1A identifies the product as a Candor Modern Seating with fully upholstered seat and back.

The numeric logic for this model with finish codes is shown below:

<table>
<thead>
<tr>
<th>SAS-22</th>
<th>A1A</th>
<th>3A-06</th>
<th>3A-06</th>
<th>M3-CA1</th>
</tr>
</thead>
<tbody>
<tr>
<td>Candor Modern Chair</td>

<tr>

<tr>

<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Beech - Amber on Beech</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

A ninth-digit suffix of the product code will indicate functional options, such as -F for CAL 133 option. There are exceptions to this logic; therefore, always refer to the price charts for product numbers rather than attempting to construct them. Product number modification instructions for additional options appear in footnoted copy for each applicable model.

Beyond the printed product number, fabric and finish codes are required to complete an order specification. To communicate your order clearly, list the product number and finish codes in the sequence outlined on each price page.

## Fabrics and Finishes

A complete listing of fabrics and finishes for Riverbend and Pebble is available in the back of the price list. Fabric is applied Railroaded to both Riverbend and Pebble products. Linear or patterned fabric is not recommended due to the manner in which fabric is applied. Material will not be pattern matched.

Riverbend sofas and Pebble ottomans feature large, flat surfaces, and textile crispness will be influenced by the amount of stretch in each textile. Some textiles will stretch more than others, resulting in a small amount of pooling. This can be addressed by running a hand across the surface to smooth the material.

## Stain Repellent

To specify add “P” to end of the product number.

Riverbend and Pebble
Seam Options

Riverbend units are available with and without a double-needle stitch horizontal seam.

When specified without horizontal seams, textiles will gently flow over the front and back edges of the seat and back, providing a simple and seamless aesthetic.

For a tailored aesthetic, Riverbend units can be specified with a horizontal seam along the front and back edges of the seat and back.

Ganging Bracket

Ganging brackets are used to gang one Riverbend component to another. When not in use the ganging bracket pivots to hide under the seat. Each Ganging Bracket Kit includes two brackets, screws, a template and assembly instructions. One kit will gang two sofas together.

Power Module

The separately specified power module provides under seat power consisting of either one or two simplex outlets (NEMA-5-15R) and one dual USB port. The Power Module must be installed along the front edge of the Riverbend seat. Power Modules may not be daisy chained together.

The Power Module is available either corded or hardwire with a 6’ or 12’ cord.

Included with the module are two cord management clips and attachment hardware.

Application may require approval from local authority having jurisdiction (AHJ); ensure compliance before placing orders and installing.

Designer  Patricia Urquiola

Fabric  Linear or patterned fabric not recommended due to the manner in which the material is applied. Because of the nature of the chair, materials that have more fibers or woolen spun yarn construction, such as Cotswold, tend to upholster well on Poppy. Synthetic fibers, or textiles with heavy back coatings, tend to be more difficult to upholster and consequently may restrict some COMs.

The following matrix shows the standard finish offering for each seating product line.

Because of the natural properties of wood, variations of grain pattern and finish color can be expected. Haworth carefully selects materials used in the manufacturing of products to promote consistent and acceptable color. Wood is susceptible to color change from exposure to UV rays. Haworth finishes include a UV stabilizer to reduce these effects.

Natural finish on Maple is a clear coat only and will show all the characteristics of the wood.

Seating COM Pattern Repeat Information 
Haworth will calculate and order COM yardage as needed for seating; however, for bid/quote purposes, please refer to the COM yardage requirements listed by each chair model. These numbers are based on solid or very small scale (under 1” repeat) fabrics. 
For fabrics with repeats listed below, additional yardage should be included in your calculations. The additional yardage allows for matching of patterns on the seating.

**Procedure**

To determine if a COM fabric has been approved for use on Haworth product, contact the Haworth Inquiry Center (1.800.426.8562), your local Haworth dealer, or go to Haworth.com/surfaces > COM Library. Haworth will calculate and order fabric unless instructed otherwise. If the dealer is to provide the fabric, they will calculate the yardage needed themselves.

If the fabric is approved, and the directional orientation (directional rightway, directional railroad, or non-directional) of the tested fabric has been confirmed, then refer to the appropriate price page for yardage requirements.

**COM Fabric Requirements**

The fabric yardage requirements for COMs given for each model are in lineal yards and are based on 54" (1372mm) usable fabric widths. Approximate yardage requirements are shown for each model within the price pages.

For fabrics already approved, with a COM order entry code assigned, Haworth will determine and purchase the yardage needed. If the fabric will be provided by the dealer, and the pattern has a large repeat or stripes, additional yardage will be needed; see the COM Yardage Requirements at the end of this price guide OR contact the COM Department for more information.

**COL Leather Requirements**

The leather requirements for COL (Customer’s Own Leather) will vary depending on the hide size and are based on square footage. Haworth will determine and purchase the leather needed.

Find total number of linear yards required for the order. Add the appropriate percentage shown below to the total yardage to accommodate fabric flaws, wrinkles and other imperfections.

- Up to 500 yards: Add 10%
- 501 to 1000 yards: Add 5%
- More than 1000 yards: Add 3%

---

**Directional Rightway:**

- 54" or 66"

**Directional Railroad:**

- 54" or 66"

**Non-Directional:**

- 54" or 66"

Cut in either direction to give best yield.

Great Expectations
You have them as a Haworth customer and so do we. And because we value our customers, we cover our products with the Haworth North America Product Compatibility and Limited Warranty Policy.

Our Commitment To Product Compatibility – Integrated Product Platforms
As a market leader in the design and manufacture of workspaces that adapt to change, we strive to maintain product compatibility within our various generations of integrated product platforms. This benefits the customer who desires to update or modify their work environment. It also benefits the customer needing to replace a product due to damage or other reasons but which is no longer manufactured or is otherwise unavailable, such as a fabric or finish that is discontinued because of changing market preferences. In both circumstances, we often can provide products with comparable function and performance.

Our Commitment To Product Quality – The Haworth North America Limited Warranty
To ensure customer satisfaction and peace of mind, we stand behind our products with the Haworth North America Limited Warranty. To review the current version of the limited warranty including its terms and conditions, please go to: www.haworth.com/warranty or contact OneTouch@Haworth.com or 1 877 429 6784.
