Planes Conference Table with Column Base

Component Specification Overview

Planes Conference Top(s), Column Base Frame(s), Column Base Plate(s) and J-Channel(s) are separately specified. See below for required component specification.

Conference Top

- The number of tops depend on the width of the conference table. Top options include a 1-piece top, 2-piece top or 3-piece top.

Column Base Frames

- Column Base Frames are square and include cladding. Available in two widths: 9"(229mm) and 12"(305mm), and in three heights: 26"(660mm) for lounge height, 28"(711mm) for seated height, and 40"(1016mm) for standing height. Cladding shapes can be round or flat. Round Cladding is only available painted, while Flat Cladding can be High Pressure Laminate (HPL), or made of wood. Column Base Frame is available painted without cladding.
  - –The table top width and the number of pieces determine the quantity of column base frames needed. **Refer to Matrix-A for details.**
  - –The table top depth determines the column base frame size, either 9"(229mm) or 12"(305mm) square. **Refer to Matrix-B for details.**

Column Base Plate

- Round or Square Column Base Plates are available in four sizes: 21"(533mm), 24"(610mm), 27"(686mm) and 30"(762mm).
  - –The column base plate size is specific to the column frame size of 9"(229mm) or 12"(305mm); specify accordingly.
  - –The column frame width and the table top depth dictate the size of the column base plate. **Refer to Matrix-B for details.**

J-Channel

- Provides wire management and the required support below the Conference Table Top.
  - –J-Channel is specified as one pair per catalog number. A pair of J-Channels are used between each column base.
  - –The table top width and column size dictate the number of pairs and length of J-Channel. **Refer to Matrix-A for details.**

J-Channel Tray - Optional

- J-Channel Trays are optional and provide additional wire management between columns; lays in J-Channels.
  - –Specify J-Channel Tray width to match Column Frame size.
  - –The J-Channel length dictates the maximum number of J-Channel Trays. **Refer to Matrix-A for details.**

Planes End Supported Top with Column Base

Component Specification Overview

The outboard end of an End Supported Top requires a column base for floor support and the opposite end requires brackets for attachment to a structural wall, Compose or Enclose panel. See below for required component specification.

End Supported Top

- Always a 1-piece top.
  –Requires one column base for floor support and brackets for attachment to a structural building wall, Compose or Enclose panel.

Floor Support: Column Base
Each Column Base requires separately specified components: **Column Frame and Cladding. The Column Base Plate is optional.**

Column Base Frames

- Column Base Frames are square and include cladding. Available in two widths: 9"(229mm) and 12"(305mm), and in three heights: 26"(660mm) for lounge height, 28"(711mm) for seated height, and 40"(1016mm) for standing height. Cladding shapes can be round or flat. Round Cladding is only available painted, while Flat Cladding can be High Pressure Laminate (HPL), or made of wood. Column Base Frame is available painted without cladding.
  –The table top width and the number of pieces determine the quantity of column base frames needed. **Refer to Matrix-A for details.**
  –The table top depth determines the column base frame size, either 9" (229mm) or 12" (305mm) square. **Refer to Matrix-B for details.**

Column Base Plate - Optional

- **Column Base Plate is an optional component for an End Support Top.** (Note: Required for a Conference Table with Column Base)
- Round or Square Column Base Plates are available in four sizes: 21"(533mm), 24"(610mm), 27"(686mm) and 30"(762mm).
  –The column base plate size is specific to the column frame size of 9"(229mm) or 12"(305mm); specify accordingly.
  –The column frame width and the table top depth dictate the size of the column base plate. **Refer to Matrix-A for details.**
