Executive Tables
Presentation Board
Installation Instructions

Tools Required

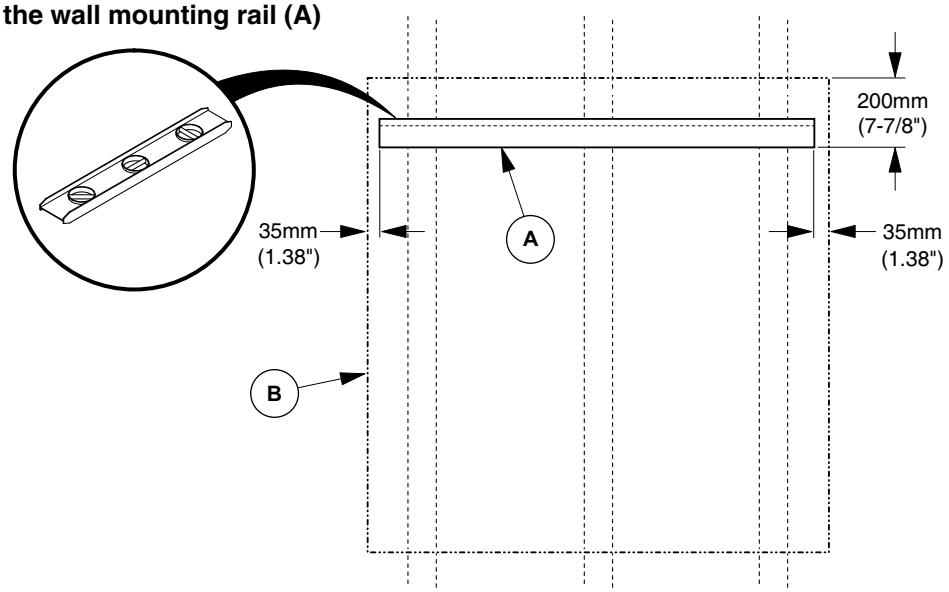

NOTE: Check all product tags to ensure product is properly staged. (Refer to Product Offload / Staging Guide)

NOTE: Presentation board MUST be fastened into studs or solid masonry walls. Due to varying wall construction, fasteners are not included and it is the responsibility of the installer to supply the appropriate wall anchor for the existing site condition.

1 **Mark a level line onto wall for the wall mounting rail (A)**

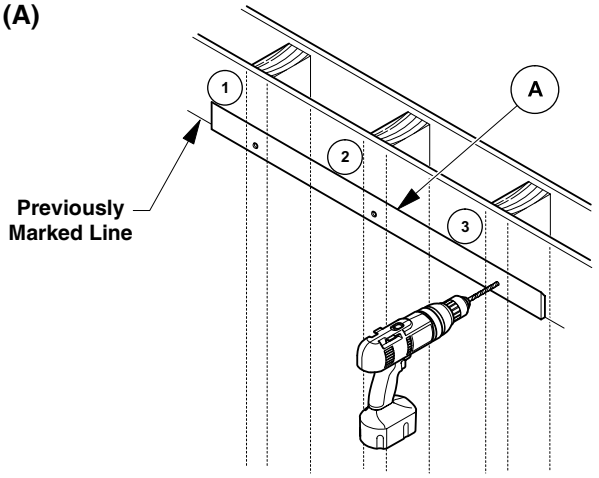

NOTE: Determine elevation of presentation board and mark a line 200mm (7-7/8") below the top surface of presentation board.

CUSTOMER SERVICE PHONE: 1-800-426-8562

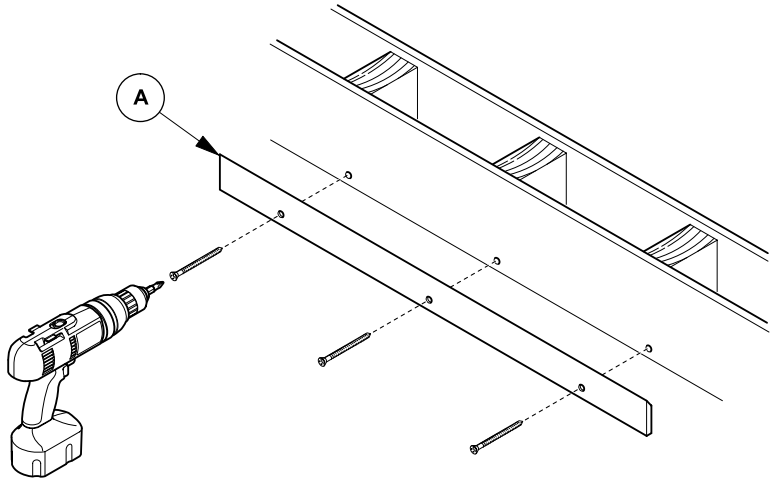

2 Drill mounting holes through wall mounting rail (A)

NOTE: Holding rail on previously marked line drill into center of wall stud or cement wall (3 mounting holes required).

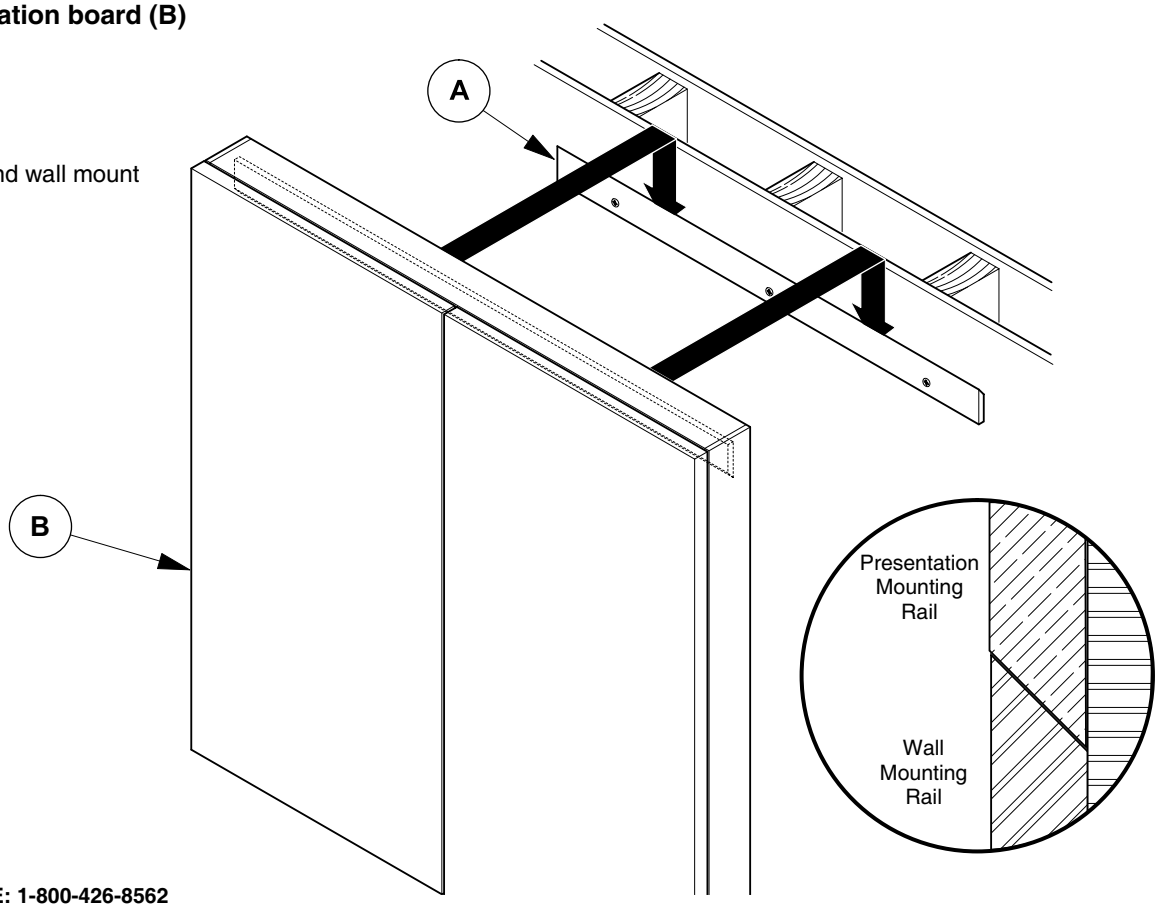

3 Install wall mounting rail (A)

NOTE: Make sure wall mounting rail is mounted opposite of clip on backside of presentation board.

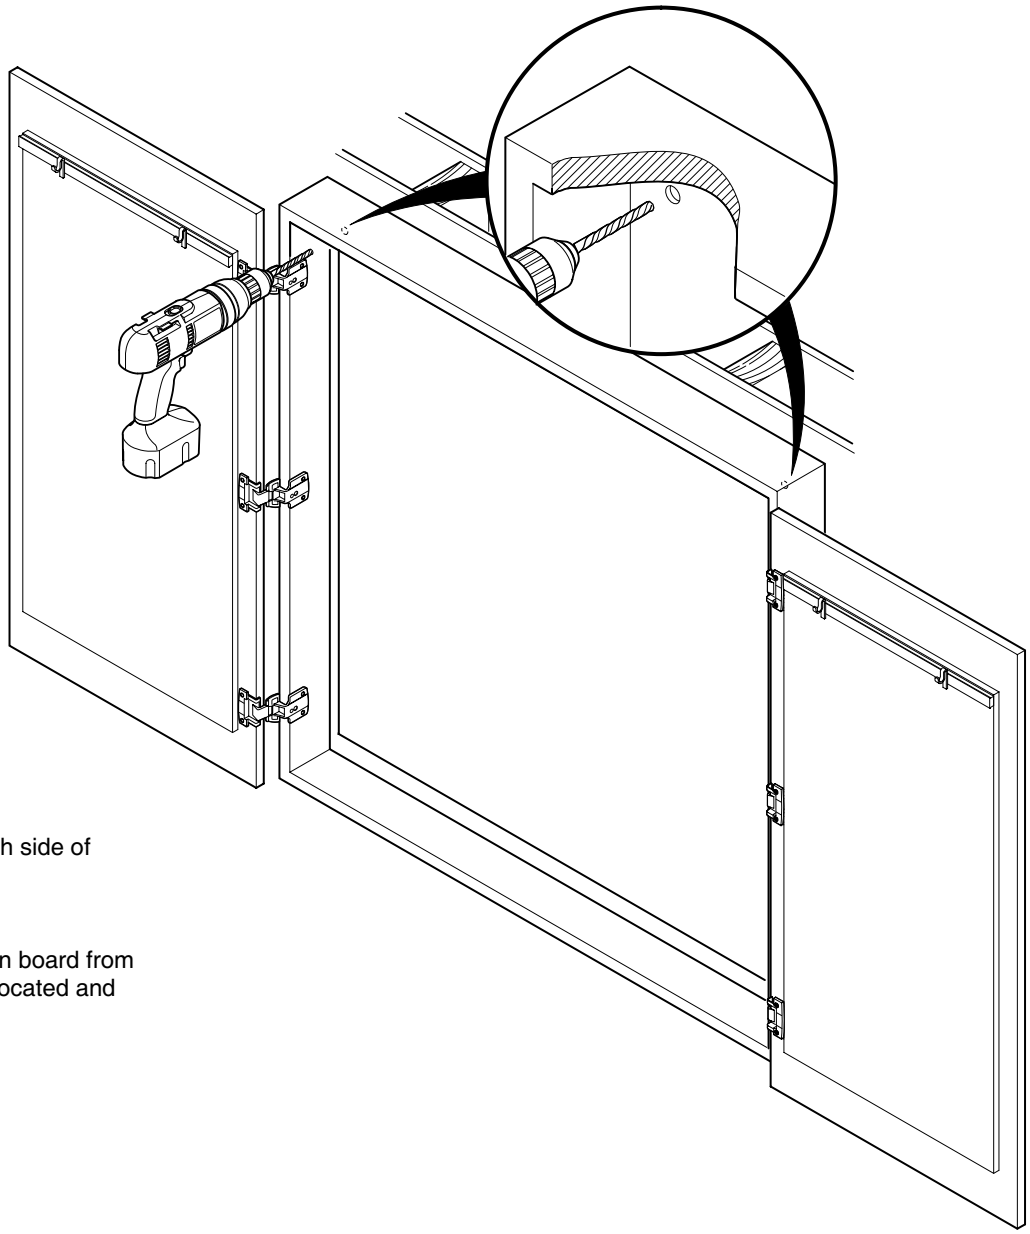

4 Install presentation board (B)

NOTE: Make sure angle and wall mount clip interlock securely.

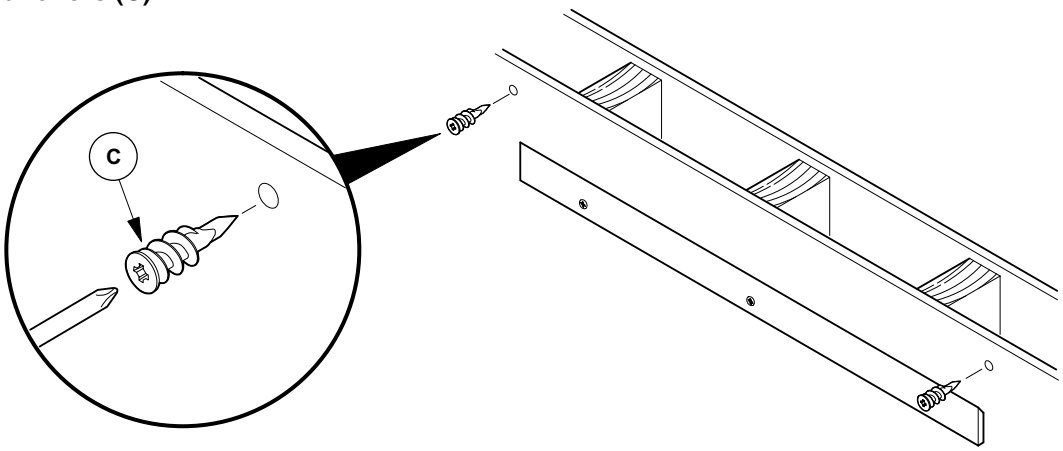

5 Drill holes for wall anchors (C)

NOTE: Predrill a hole in each side of presentation board.

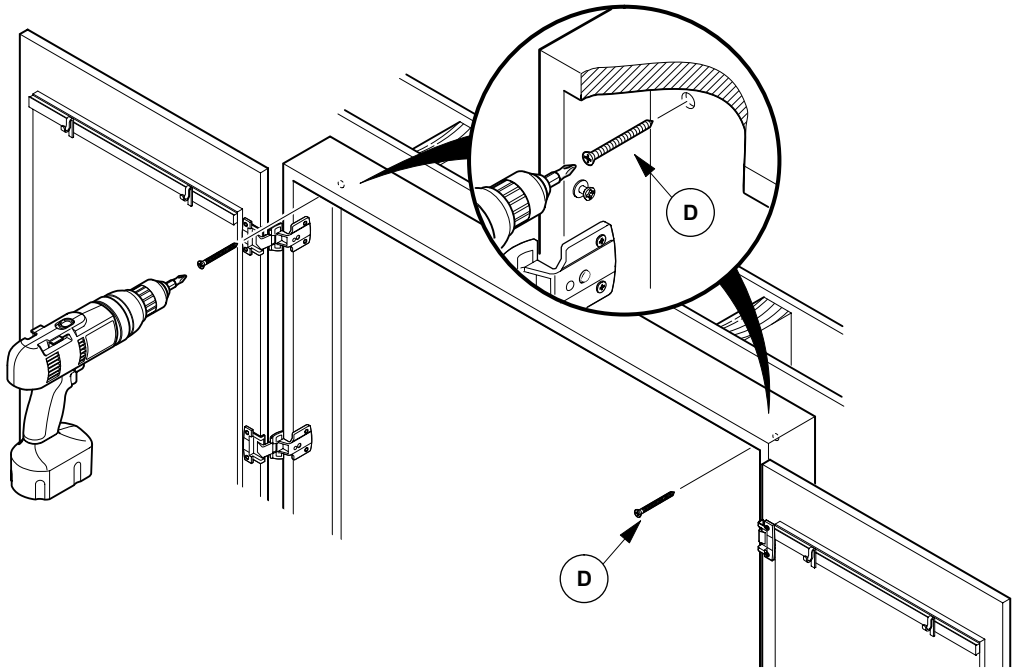

NOTE: Remove presentation board from wall once holes have been located and predrilled for wall anchors.

6 Install wall anchors (C)

7 Install dislodgement screws (D)

NOTE: Position presentation board back on wall cleats and align holes in presentation board with wall anchors.

8 Attach front facia (E)
