

HAWORTH®

# Daimler

Beijing, China

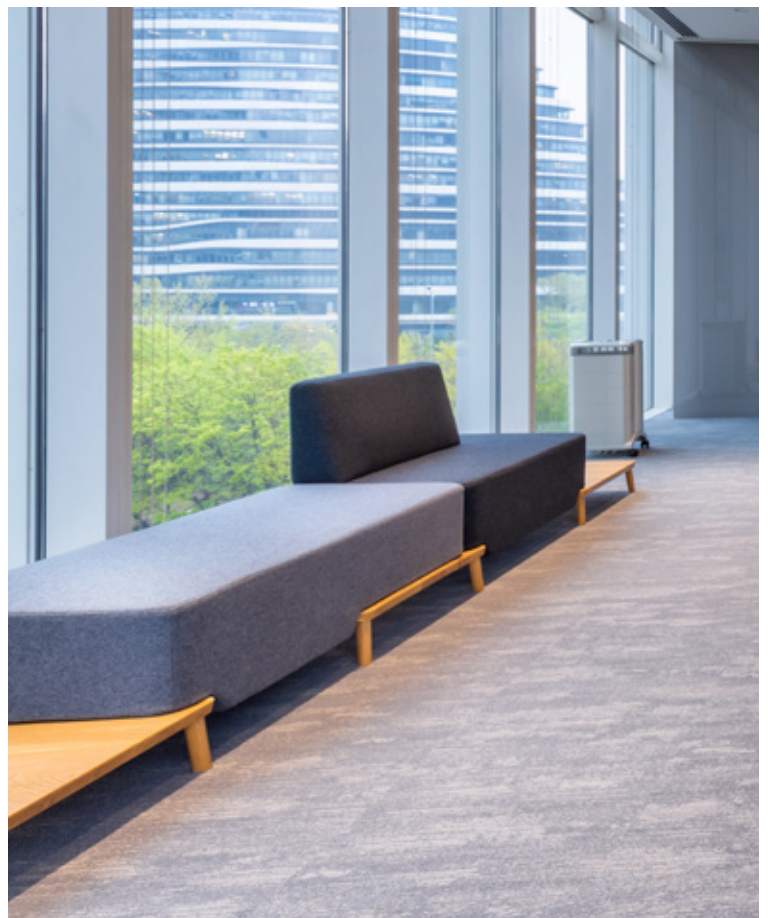

---

Case Study

The Daimler Group is one of the biggest producers of premium cars and the world's biggest manufacturer of commercial vehicles with a global reach. When it moved into its new 23 floor Beijing office building, it asked Haworth to supply a range of collaborative furniture to support the flexible workstyles of its staff for greater morale and productivity.

As an excellent option for Daimler's flexible floorplates, we chose our Very wire stool in concert with IQ Commercial pods for informal team meetings with integrated power/data/USB to deliver media-rich presentations.

Planes HAT tables offer height-adjustable flexibility for the ultimate in workplace wellbeing. In breakout zones, Collaborate and Mama Bear lounge seating combines with Orbit and Elan tables for mobile brainstorming and exceptionally comfortable idea generation activities. Luxxbox Podia sofas allow users to connect, retreat, discuss and relax.
