

HAWORTH®

Global Financial Leader Singapore

Case Study

When it came time to refurbish its managerial workspaces and conference room, a leading financial institution called in Haworth to help. We worked with design firm, Mark Ormsby Interiors to achieve an efficient, fit-for-purpose result for the company in record time.

The client had to vacate its existing workspace before construction on the new space was complete. Our solution? We installed temporary workstations and provided warehouse services until the build finished, so staff could continue working productively with minimum disruption.

After building completion, we transferred managers from enclosed rooms into a new open space designed for the ultimate in collaboration and flexibility. Together with the designer, we developed semi-enclosed workstations using Xone and Shift panels with height-adjustable desks to make the transition easier.

The breadth and flexibility of AP Planes tables combined with X99 Seminar and Guest seating in the new Conference Room are designed to encourage a more collaborative environment with mobile furniture, easy reconfiguration and access to power and data.

In the Front of House Reception area, we installed elegant Archibald chairs and Bob tables for a sophisticated foundational look. Borders and Point Stools in the collaborative space add an unexpected twist to the conservative setting and allow for spontaneous brainstorming and co-working.
